BIENNIAL REPORT

OF

THE STATE'S PRISON,

FOR THE YEARS 1899 and 1900.

To His Excellency The Governor of North Carolina.

My Dear Sir:—I have the honor of transmitting herewith reports of the Superintendent, the Manager, the Executive Board and the officials of the State's Prison, embracing its operations for the years 1899 and 1900; and also showing its physical and financial condition at the present time.

I beg leave also to direct your attention to a special report, herewith submitted, of a Special Committee which was appointed to investigate and report as to the correctness of the official reports of the State's Prison.

In accordance with a resolution of the Board of Directors, I call your attention to the great injustice being done to that class of unfortunates, miscalled criminal insane, by confining them in the State's Prison, and convey to you the recommendation of this Board that some other provision be made for them.

As Chairman of the Board of Directors, I am especially gratified at the excellent condition in which we find the Institution, as shown by these reports, at the close of this administration.

With great respect, I am,

Your obedient servant,

James C. Davis,

Chairman Board of Directors N. C. State's Prison.

REPORT OF THE EXECUTIVE BOARD.

To the Board of Directors of the State's Prison.

The Executive Board respectfully reports that they have assisted in the preparation of the report of the Superintendent, and had him include in it such figures and statements as they would desire to submit to the Board. A detailed report by the Committee would necessarily be a repetition of the matter contained therein. We therefore simply indorse and adopt the Superintendent's report.

We congratulate the Board upon the excellent outcome of the past two years' management of the Institution

We are ready to turn over the State's Prison to whatever management may succeed us, in such condition that it will not need any appropriation from the next Legislature. We can turn over to them $101,668 in available cash assets, together with probably an ampler supply of provisions for the ensuing year, and better equipped in every department than it has been in its history.

We have on hand sufficient cloth and clothing to furnish the convicts for half a year, about 45,000 pounds of pork, 2,500 bushels of potatoes, and other provisions. The farms are equipped with first-class teams, good implements, and have 16,000 bushels of corn and 400,000 pounds of hay—sufficient to supply them during this year.

In addition to the above-mentioned supplies and cash assets to be used in the operation of the Institution another year, we have made contracts to furnish labor, which will yield about $4,000 in cash per month.

The convicts have been amply clothed and plentifully fed, and in every respect most kindly treated.

We believe the Institution is in such condition that, with proper management in the future, it will never cost the State another cent.

Respectfully submitted,

E. L. TRAVIS, *Chairman.*
W. C. NEWLAND,
J. W. PERRY,
Executive Board.

REPORT OF SUPERINTENDENT.

RALEIGH, N. C., *January 1, 1901.*

To the Honorable the Board of Directors of the State's Prison:

In obedience to the provisions of the Acts of Assembly, Laws of 1897 and 1899, I respectfully submit my report for the years 1899 and 1900. The report for the year 1899 was submitted last January, but was not published; and this will be published as a Biennial Report. I repeat the report for 1899 in part:

On assuming control of the Institution on the 1st of January, 1899, I had the properties belonging to the State's Prison carefully inventoried, said inventories having heretofore been laid before you. On the 31st of December, 1899, I again had inventories taken, which were laid before you. And, to-day, I have caused the inventories to be again taken; and these last will also be laid before you as a part of this report. These all show a large appreciation of the State's property by substitution of new for old and worn-out stock, materials and implements.

In making out the accounts and tables for the years 1899 and 1900, I have disregarded precedent, and have eliminated from said accounts all articles produced and consumed by the State's Prison; as, in my opinion, this tended to confuse and mystify the public, because the amount in value of such things can not be ascertained with any degree of accuracy; and, besides, any article produced and consumed by the Prison balances itself.

Appended to my report you will see an itemized statement of the receipts and disbursements for the years 1899 and 1900; also a tabulated and condensed statement.

Of late years, by legislative enactment, chain-gangs have been established in a great number of counties. From these counties we are getting only the infirm and diseased convicts, the able-bodied ones being utilized at home. It seems to me that it is but fair to this Institution that some provision should be made by the Legislature requiring these counties to maintain their own infirm and diseased prisoners. If the present course continues to be pursued by the counties that have established chain-gangs, in a short while half of the Prison population will be decrepits

While our receipts disclose the fact that we have earned and paid into the Treasury more dollars than any preceding management, at the same time it shows a corresponding increase in expenditure. This result was inevitable when we consider the condition of the Institution when it came into our hands, and the many permanent improvements absolutely necessary to be made. On the farms, the livestock was old and worn out, the agricultural implements were worn and out of date. We now have on hand magnificent livestock only, and our farming implements are of the most improved kind, and in good repair.

At the Central Prison we found the Administration Building unfinished in part, and almost without furniture. We have completed the same and furnished it comfortably. We found the sanitary arrangements of the cell blocks in a deplorable condition, insulting one's nostrils as he entered the corridors. This has been remedied. We have substituted 365 iron bedsteads, with good mattresses, for a like number of old bunks, which were vermin harbors. We have also furnished to the cells pillows, blankets and sheets. We have provided baths for the prisoners, and they are required to bathe once a week, and are at liberty to exercise this privilege as often as they please.

We were paying about $400 per month for our lights and power. This sum went largely to maintaining lights in the Criminal Insane Department, where we were required to furnish lights. The management concluded that it was in the interest of economy to instal an electric light plant of our own; and, after making careful inquiry, and inviting bids for the putting in of the plant, we decided that it would be cheaper and better to employ an electrician to do the work. We therefore secured the services of Mr. J. H. P. Cilley for this purpose, and we now find ourselves with the most complete and modern electric light plant in the South. This not only furnishes ample light for all purposes, but, in addition, gives us power to run the shirt factory, our pumps, and other machinery. We have put arc lights on the grounds, in the front and rear. These lights are not only ornamental, but they prevent the hiding out of the prisoners, and in this way are indispensable. We have put in each cell an eight-candle power incandescent light. These take the place of the tin lamps heretofore used in the cells, which were a menace to the security of the Prison from fire, and a source of uncleanliness. We owe to Mr. Cilley our thanks for efficiency, intelligence and zeal in the performance of his duties.

After consultations with the Executive Board, we discontinued farming operations on the Cape Fear River, at the Castle Hayne and Lyrias Farms. This, because the enterprise was unprofitable and a burden. The lease of the Northampton Farm expires on January 1, 1901, when that farm will also be abandoned.

The Physician's report will show the health of the prison to be better than at any time in its history. And I believe, from personally observing the convicts, that they are better satisfied with their condition and treatment than heretofore. They seem cheerful, bright and

contented. The cost of maintaining the prisoners per capita is greater than at any period of the Institution's history. This results from two causes—first, provisions are all higher, and, second, there has been no stinting in food or clothing.

Religious services have been held regularly each Sunday at the Central Prison and on the various farms and camps. At the Central Prison they have been conducted by ministers of various denominations; and Messrs. McPheeters, Pullen, Whiting, Bell, Waite, Blake, Curtis, Brizzle, Roberts, Chamberlain, Hayden, and Mrs. Blair and Miss Bilyeu, by religious exercises and Sunday School work, have done inestimable good among the prisoners.

Under chapter 607, section 2, Laws of 1899, the Executive Board purchased from John P. Futrell and others that tract of land on the Roanoke River, known as Caledonia; and the permanent improvements, other than those made at the Central Prison, have all been made on this farm. We paid for this farm $61,000. The State can sell it for cash for $100,000 at a day's notice.

As is well known, there has been a strip of land immediately in front of the Institution, known as the Boylan lands. A year or so ago this was surveyed and divided up into building lots, and was being rapidly sold, and the erection of small and unsightly tenement houses begun just in front of the Administration Building. The management of the Penitentiary decided to buy a block of this property, to grade it and open up a new, convenient and attractive approach to the Institution. This land was purchased at a cost of $950, the grading for the new approach has been done, and within a very few days the paving and other work will be completed, and the Institution will have a new avenue of ingress and egress, both convenient and attractive.

This was not only a desirable improvement, but it became a necessity for the protection of the Institution; and the new driveway will not only be an ornament and convenience to the Institution, but to this part of the city as well.

In addition to the raising of corn and cotton, the management have found it profitable to grow Spanish peanuts on the farms. During the current year we planted on the various farms about one thousand six hundred acres of this crop. After inquiries and consultation, we deemed it wise and prudent to establish a factory for the cleaning and hulling of these nuts, believing that in so doing we would save the State a sum greater than the cost of building, machinery, etc. And, finding that the experiment could be made without cost or risk to the State, we made a contract with reliable parties who are thoroughly familiar with the methods of cleaning, hulling and preparing peanuts for the consumer, and with the peanut trade generally, by the terms of which contract the State receives first of all the market price for the nuts, and one-half of all the profits made by the peanut factory.

In erecting the building, the management had in view also the installing therein of a first-class roller process flour mill, for meeting the demands of what we hope and have reason to believe will be a very extensive Caledonia wheat crop for this year; the management having seeded more than seven hundred acres of the best of those lands in wheat during the past autumn; using on the same $1,500 worth of special wheat fertilizers, which have also been paid for.

RECAPITULATION ON 1ST OF JANUARY, 1901.

Cash in the treasury	$1,749.91	
Cash in drawer	2,309.33	
Bales of cotton, 1,000	42,500.00	
60,000 bushels peanuts, 80 cents	48,000.00	
Beef cattle, 50	500.00	
Wheat on hand, 650 bushels	500.00	
3,000 bushels oats	1,400.00	
8,000 bushels cotton seed, 20 cents	1,600.00	
150 tons hay for sale	1,250.00	
2,000 bushels corn for sale	1,200.00	
400,000 brick, $5	2,000.00	
606 mattresses	600.00	
Shucks to hackle—50 tons, $15	750.00	
Bills receivable, after deducting doubtful debts	14,500.00	
		$118,859.25
Our debts were on 1st day of January, 1901		17,191.19
OTHER ASSETS—		
This leaves a cash balance in our favor which passes into the hands of our successors		101,668.05
In addition to this balance, this institution has on hand 31,000 pounds of pork of our own raising, killed and cured, worth in cash	1,860.00	
We have also 100 fat hogs to kill, which will make 15,000 pounds of pork worth	900.00	
We have also 700 acres in wheat in fine, thrifty condition, upon which we put $1,500 worth of fertilizers	1,500.00	
We have also on hand already a supply of cotton and yarn convict stripes paid for, sufficient to last us half of the current year	1,800.00	6,060.00
		107,728.05
We have expended for permanent improvements during the year 1899	11,003.98	
For the year 1900	21,138.80	32,142.78
		139,870.83

We have received from special appropriations for the past two years $105,414.10. Deducting this from the general balance, we find that the Institution has lived two years, and finds itself with $34,456.73 of profit And in addition to the cash items above referred to, we have an abundance of corn, hay, shucks, fodder, etc., to last

the Institution a year; besides large numbers of milch cows, hogs, turkeys, chickens, ducks, etc., at every farm camp.

In last year's report I submitted an estimate of the cash value of crops on hand January 1, 1900. We received from sale of the same, $2,898 more than said estimate. I am sure the estimate of values now given is even more conservative.

It is a matter of congratulation to the management, and I know it will be so to your honorable body, to see that for the years 1899 and 1900 the State's Prison has been absolutely self-sustaining. It were idle here to discuss or even to refer to the criticisms upon this Institution. To them all, we answer with figures that are open to the inspection of the world; and we court the fullest and freest investigation at the hands of the Legislature and of the public.

I do not arrogate to myself the whole credit of this result. I have had faithful, efficient and loyal support from officers and employes alike, and I beg here to extend to them, through your honorable Board, my sincere thanks for the same.

Whatever of credit comes to the management of this Institution during the past two years is due to the Executive Board and Manager, equally with the Superintendent. Whatever of discredit, also falls equally on the Executive Board, Manager and Superintendent. No steps have been taken without full conferences, and the conclusions reached were the conclusions of all alike.

Respectfully submitted,

W. H. DAY,
Superintendent.

REPORT OF SPECIAL COMMITTEE.

To the Board of Directors of State's Prison:

Your Committee appointed to examine the reports of the Superintendent and your Executive Board, beg leave to respectfully report, that they have examined the reports referred to them and find them correct; and it is with a feeling of gratitude to the management that your committee finds the Institution in such excellent condition.

We recommend their adoption.

Respectfully submitted,

M. F. MORPHEW, *Chairman.*
J. L. GWALTNEY,
EDWARD T. CLARK,
L. M. BRYAN,
HEENAN HUGHES.

REPORT OF THE MANAGER AND PURCHASING AGENT.

Captain W. H. DAY, *Superintendent, and* Hon. E. L. TRAVIS, *Chairman Executive Board State's Prison.*

GENTLEMEN:—I append herewith a general statement, covering the receipts and expenditures of this Institution for the years 1899 and 1900, which explains itself. Both sides of this balance sheet show gains over previous years; our earnings have been greater, nevertheless we have 250 to 350 convicts less than were here in 1895, 1896, 1897 and 1898. Our cost of maintenance per capita has been greater for several reasons. It is well known that the cost of almost everything purchasable is greater than it was in former years; besides, while we have not been extravagant, the prisoners have been abundantly fed and well clothed; "feed well, clothe well and work well," has been my motto, and the motto of this administration.

It has been gratifying to me, as I know it has to you gentlemen, to have been able to put the Institution in such physical condition as to elicit favorable comment from the Boards of Health and Charity, from almost every visitor that comes to the Institution, and from people generally who are at all informed as to the facts.

As to the financial condition of the Institution, the Superintendent's report gives the figures, and such figures as show beyond cavil its healthy financial condition.

I regret very much to have to direct the attention of you, gentlemen, to one serious problem that confronts the future management of the Institution. Our general water supply has been obtained from the lake formed from quarrying stone at the east end of the premises;

for three years the supply of water in this lake has been gradually diminishing, from what cause I do not know. Prior to three years ago there was a continuous overflow from the lake, besides furnishing to our pumps an abundance of pure, wholesome water. It has gradually gone down during these three years, until to-day, the surface of the water is 15 feet below the outlet for the former overflow, and it is every day growing lower. In view of the fact that this lake has furnished heretofore such an abundance of pure and wholesome water, it is a matter of universal regret that from some cause, natural or otherwise, that it seems impossible to correct, that this great convenience should be passing from under our control. Of course, if this difficulty continues much longer, the management of the Institution must look elsewhere for a water supply.

The Legislature, some years ago, by special enactment, created what is known as the "Criminal or Dangerous Insane Department," and located it in the west end of the Penitentiary building. This, the management of this Institution thinks, with all good citizens who have given serious thought to the matter, was a grievous mistake. There can be no such thing as an insane criminal, for an insane person can not commit crime, and the few unfortunates that are stowed away in one corner of the State's Prison are perhaps no more dangerous than a large majority of those confined in the Hospitals at Raleigh, Morganton and Goldsboro. It is a discrimination that should not be made. The Department is a menace to this Institution, its establishment an injustice to these poor unfortunate people, that the incoming Legislature should correct.

Under the act establishing this Department, the State's Prison was called upon to furnish heat, light and water, which it has done to the best of its ability, at consider-

able cost and expense and inconvenience; but it is not for this reason that we complain; it is for humanity's sake, and for the sake of that class of the poor unfortunates of humanity who can not make their own appeals, and this management respectfully asks the Legislature to take out of the Pentitentiary these poor mind-beclouded creatures, whom God, in His wisdom, has so sorely afflicted.

The plumbing in the Central Prison is old and worn; the water- and steam-pipes and fittings are getting particularly troublesome, and it is going to take a right considerable expenditure to replenish the buildings, but I think, with the resources in hand, the work can be done without asking for appropriations.

The old stockade around the premises was in an advanced state of decay. We have during the past year put up a new stockade on the north and east sides, the remainder of the old part will have to come down and be replaced with a new and safe enclosure; but this, I think, can be done without resort to appropriations. The management, I do not hesitate to say, has been generous to its neighboring State Institutions; it largely fed and otherwise maintained the "Dangerous Insane Department" for a good portion of the first half of 1899; it furnished cooks and other servants for the greater part of that year, for all of which it has received nothing.

It did for the "A. and M." College some one thousand five hundred dollars worth of grading on its athletic grounds, for which it made no charge. It graded a new driveway around the east end of the Fair grounds, for the North Carolina Agricultural Society, for which it made no charge. It furnished to the Soldier's Home sufficient brick to build its new and commodious Hospital, nearly 50,000 in number, and while they stand charged to the Home on our books, I know this entire

Management would recommend that the brick be donated to the Home, and the debt be cancelled. We have not included this debt in our estimate of bills receivable.

As the Business Manager of the Institution, I think I am perfectly safe in stating that it is to-day possessed of sufficient resources, including cash, saleable assets, bills receivable, together with farm, garden and other supplies, to run the Institution during the year 1901 on practically a cash basis.

We have in available cash assets, as is shown in the Superintendent's report, in round figures, $100,000 over and above our liabilities to turn over to our successors. We have contracts for labor on railroads, in Shirt Factory, and on other works, that bring into our treasury $4,000 to $4,500 of earnings per month. We certainly will have an income from the Brick Yard of $25,000; these items, together with other available moneys for labor, etc., the supplies on hand, as shown by the inventories, should be amply sufficient to run the Institution during this year without any embarrassment to the management.

I thank you, gentlemen, for the confidence you have reposed in me, and I thank you, and through you, each and every member of the Executive Board and the Board of Directors, for uniform kindness and courtesy at all times.

Yours, with great respect,

F. B. ARENDELL,
General Manager and Purchasing Agent.

BALANCE SHEET OF N. C. STATE'S PRISON.

COVERING A PERIOD FROM JANUARY 1, 1899, TO JANUARY 1, 1901.

1899.			1899.

REPORT OF THE WARDEN.

RALEIGH, N. C., *January 1, 1901.*

HON. W. H. DAY, *Superintendent N. C. State's Prison,*
HON. E. L. TRAVIS, *Chairman Executive Board,*
Raleigh, N. C.

SIRS:—I beg to submit the following report for the years 1899 and 1900:

The general conduct of the prisoners of this Institution for 1899 was fairly good; and it is very gratifying to add that the improvement in their general behavior has been so marked that I can't but call your attention to it. Of course in so large a number of criminals there must necessarily be some refractory ones, but this class is so hopelessly in the minority, that the influence of the better ones predominates to such an extent that those coming in—unless unusually bad—generally try to follow the example of the latter class; in consequence of which punishment is seldom resorted to.

Services are held regularly on each Sunday afteroon by the pastors from the city of different denominations. The Sunday School is regularly conducted every Sunday afternoon by Superintendent A. M. McPheeters, assisted by Messrs. John T. Pullen, S. W. Whiting, Mrs. I. C. Blair, and others.

The commutation system proves a great benefit, and is one of the greatest incentives to good behavior among the prisoners.

The sleeping apartments or cells are kept in good condition, no complaint being made as to uncleanness. Clean sheets and towels are furnished weekly, and oftener, if necessary. The apartments are inspected

daily by me. No prisoner is allowed to sleep in wet clothes, the Hall clerk supplying the necessary wearing apparel. As to comfort and cleanliness, our cells will challenge favorable comparison with any prison in the country. We have taken out all the old wooden bunks, and supplied each cell with a new iron bedstead and a new mattress, all of which have been made in the prison.

The machine shop has made all the iron bedsteads used in our cell blocks; has made and kept in repair all our wheelbarrows used on the brick-yard, farms and other places; has made and kept in repair all the wagons used at the Central Prison, and all the wagons and carts necessary for our own use and the equipment of the farms.

Owing to the condition and construction of our sewerage system, a large amount of time is consumed in keeping them in repair. The pipes have been laid without any covering, etc., and causes them to need daily repair, and I would suggest that a sum be expended sufficient to entirely renovate the whole plumbing system of this Institution, and I believe that this expenditure would be both wise and economical.

The sanitary condition of our Institution, as seen by the mortality, will challenge a like comparison with any other penal institutions.

We made and burned, in 1899, 13 kilns of brick; in 1900, we made and burned 19 kilns of brick, 1 of which was made in 1899, and the green brick carried over without having been burned. We now have on hand 95,000 hard brick; 270,000 salmon brick, and 52,560 green brick. The hard brick are worth $6 per 1,000 on the yard, and the salmon brick are worth $5 per 1,000 on the yard.

We commenced operations in the shirt factory in Oc-

tober, 1899 In this connection we have employed the majority of our women, all of whom are good operators.

We cultivated 35 acres in the garden each year, which has given both the officers and the prisoners an abundant supply of all kinds of vegetables, which has added much to the comfort and health of all. After having been supplied with summer vegetables, we now have on hand a supply of turnips and potatoes for the winter months.

It is with pleasure that I can say the suggestion in my report of 1899, in regard to the installation of an electric plant of our own, has been acted upon, and is the realization of a long-felt want. Every cell is now furnished with an 8-candlepower burner, which gives sufficient light for reading in any part of the cell, thereby doing away with the objectionable smell and disagreeable smoke of kerosene lamps. In addition to this, we are running our pump and shirt factory by electric motor, and have placed 5 arc lights inside the stockade, which so illuminates the grounds that one can be seen in any part of them.

I believe it would add much to the discipline and dignity of our Institution to have all our overseers and guards wear some uniform clothing, and our prisoners some uniform hat. In fact, I fully believe that we will find it just as essential for our guards and overseers to wear a uniform as cities and other institutions have found it to be.

Our present system of weighing, measuring of prisoners, etc., for the purpose of identification, is so crude and out of date, that I hope you, gentlemen, will pardon me if I suggest to you the adoption of the "Bertillion" system of photographing and measuring, or some other equally good. In my opinion, too much care along this line can not be taken, as it will have a strong tendency

to check attempts at running away, and in case of an escape, will greatly facilitate his recapture, as there can, under this system, be no trouble to identify any one.

Last, but not least, I would call your attention to our water supply. At the present rate of decrease, in six months more we will be obliged to look elsewhere for our water supply. The fall for the past twelve months has been about fifteen feet, and the ratio of the fall is on the increase: that is, each day seems to lower the water in our lake more than the preceding day.

Respectfully submitted,

W. W. GREEN,
Warden N. C. State's Prison.

PHYSICIAN'S REPORT.

To the Honorable Board of Directors of the North Carolina Penitentiary.

GENTLEMEN:—With the close of the fiscal year it becomes my duty and pleasure to submit to you the Physician's report for the year 1900.

I regret that I am unable to give you a report of the female hospital at the Central Prison, but as a correct record could not be found when I assumed charge, in November, makes it impossible.

The sanitary condition of the cell blocks and the prison as a whole is good. In the hospital there are faults in architecture, etc. For instance, there is no ventilation other than that from the windows, which, in case the hospital should be full, or nearly so, would be quite inadequate. Nothing is more essential to man, especially the sick, than pure, fresh air. This air, warmed from an engine below, should be carried to the hospital through ventilators.

Another equally important change is that of separate apartments for the tubercular subjects. This disease is very easily contracted one from another, and while separate apartments so far have not been available, I have been able to make a change even more necessary, which should never be overlooked, and that is complete isolation of their eating and drinking utensils, as it is the most common means of transmission of this most fatal malady.

The drinking water is excellent, as is evidenced by the character of diseases shown below The sewerage arrangement also is excellent.

A short time ago I met both Dr. K. M. Ferguson and

Dr. H. B. Fergerson and made an inspection of the prisoners' quarters on the farms. I found the sanitary condition all that could be looked for, excepting the water supply on the Tillery and Caledonia No. 2 Farms.

The Caledonia Farm No. 1 has a bored well 80 feet from surface, which is very good. I would suggest similar wells be bored on the other two, would also suggest the erection of wind-mills and severage system. This will cost little and be a permanent improvement. Dr. K. M. Ferguson, out of an average of 320 prisoners during the year, reports not a single death, excepting two who died in the field from sun-stroke. Dr. H. B. Fergerson reports only two for the Northampton Farm. Dr. Ashe, Physician to the Anson Farm, has had only one death in two years, and that from sun-stroke. This is certainly a phenomenally low death rate. Their reports given below is better evidence of the ability of these gentlemen than anything I can write. I attribute much of this success due to the careful attention these prisoners receive daily as dispensary patients from the doctors in charge, thus, by timely medication, preventing illness. Each day the doctors visit the quarters, and as many other visits as are necessary.

The average number of prisoners in the Penitentiary during the year is 956, the number admitted during the year is 333.

On November 1, I succeeded Dr. J. R. Rogers as Physician to the State Penitentiary. Since that time there has been a number of cases of sickness and minor operations, but, so far, no deaths.

Below I give you tables containing the number and classes of diseases treated at the Central Prison, and the doctors' reports of the farms as sent to me. In addition to the deaths given below, there occurred four other deaths at camps.

I can not conclude this report before I beg to thank you, and your most Honorable Board and Management, for the trust conferred upon me, and sincerely hope the future shall prove it has not been misplaced.

Respectfully,

H. McKEE TUCKER,
Physician in Charge.

REPORT OF BOARDS OF HEALTH.

WILMINGTON, N. C., *December 27, 1900.*

Board of Directors State's Prison.

GENTLEMEN:—In accordance with the instructions of the Board of Health, I visited the State farm near Wadesboro, and beg leave to report that it had a satisfactory air of cleanliness, and as much comfort as the buildings could afford.

The barracks were amply sufficient in air space for the number of convicts, amounting at my visit to 35, and would provide for the safe accommodation of double that number. The latrine in the end of the barracks were carefully cleaned, and had been freshly limed for use at night. The air in the building was wholesome, and the prisoners were clean. Sewage matter accumulating in the tubs under the corner of the barracks at night, and under the closets in the yard during the day, is carried each day to a ditch an eighth of a mile from the prison yard and emptied. The ditch carries the matter to a neighboring creek, and is thoroughly cleansed by rains, the fall of the creek providing for its efficient flushing. The food supplies seemed ample, were clean and of good quality.

I found three wells on the premises: One behind the laundry—an old-fashioned one with wooden curbing—from which I was assured that only water for washing was drawn; another, in the yard of the enclosure, had been dug down through a layer of rock to a depth of 46 feet, and curbed with 24-inch terra-cotta pipe, the space on the outside of the pipe being closely packed with sand and loose stone. This well was dug with the idea of use for the barracks, but the prisoners disliked it,

and the Superintendent had returned to the well in front of the yard (several hundred yards from any source of contamination), yielding an apparently safe supply. This water, I was informed, was used entirely for drinking and cooking.

There had been very little sickness in the station, and none of any serious character, except a case of sunstroke last summer. The room set aside for the hospital was quite comfortable and very clean. I respectfully submit that the healthfulness of this station is well assured, and the care of the inmates is in good keeping.

I wish to acknowledge the prompt attention of the Superintendent, Mr. Wall, and his Steward, Mr. McMillan, and their courtesy to your reporter during his visit; with this to their credit, that my visit was entirely unexpected, and I found matters as I should suppose they would be every day.

Yours very truly,

GEO. GILLETT THOMAS,
For Board of Health of North Carolina.

RALEIGH, N. C., *December 29, 1900.*

DR. GEO. G. THOMAS,
President State Board of Health.

DOCTOR:—In obedience to your direction, I visited the State Farms in Halifax County, N. C., known as Caledonia, Nos. 1, 2 and 3 (to make the biennial inspection required by law) with Dr. Henry W. Lewis, of Jackson, N. C. I reached the farms on the night of December 27, made the inspection December 28, and reached home December 29.

Dr. Lewis came down to the river on the morning of the 28th and found the ferry boat lodged in the mud

away from the bank, where it could not be reached or moved with any available force, and after remaining there until about 3 p. m. returned home, and I made the inspection without his assistance, but cordially supported by Messrs. C. J. Rhem, in charge of Camp No. 2; J. H. McIver, in charge of Camp No. 1, and the second in command of Camp No. 3, in charge of C. N. Christian, who was absent. And of said inspection I have the honor to report as follows:

No. 2 (Capt. C. J. Rhem): 92 convicts, confined within a stockade at night covering an area of about 4 acres. The sleeping dormitories, 30 by 75 feet, 12 feet pitch, ceiled overhead and roofed with tin. In each of these dormitories were 60 double bunks, in barrack form, heated with 2 stoves, lighted by 12 windows, ventilated through center of ceiling and apex of roof; only 1 dormitory in use.

Dining-room, 30 by 90 feet; 12 feet pitch; seats and narrow plank tables to full capacity of convicts, and 2 small plain closets; light and ventilation as in dormitories.

Hospital, 30 by 42 feet; lighted and ventilated as dormitories; 1 drug room inclosed; 1 dispensing closet; 8 beds, wooden frame and slats; mattresses made on the grounds. Patients, 2—1 suffering from malaria, the other from a cut; 4 have died during the past two years (2 in 1899 and 2 in 1900).

The laundry is 10 by 15 feet. The cook room 17 by 35 feet, contains a large iron boiler, oven and stove, in and on which the food of the convicts and patients in hospital is prepared. The building is rough and the oven needs repair. I have seen cleaner places, but the food was of good quality and seemed to be well prepared. The Quartermaster and Commissary occupy the same room, 24 by 36 feet, adjoining the kitchen.

The wash-room and bath-room are consolidated, 24 by 30 feet; 3 large iron kettles are used to heat water for both purposes; a dozen tubs or half-barrels are used for bathing on Sundays, in which all are required to participate—and new convicts immediately upon their arrival upon the grounds.

The dairy—very crude—is 10 by 12 feet; the smoke-house 14 by 20 feet, and the workshop 14 by 34.

Water is supplied from 4 deep wells, in and about the premises, raised by hand-lift pumps, of which the water (superficially) is good. Ice-houses they have, but no ice last year, and little prospect for the coming year, save that which is obtained from a distance for hospital and official use.

The closets throughout the buildings are plain iron hopper pattern, rinsed out and limed after use, and they empty into wooden tubs upon the ground beneath, which are emptied every morning. The rooms of the overseers and guards (one to each class) are small, ceiled, and have fire-places, but the furniture is certainly not creditable. They sleep on wooden frame bunks and slats of the most ancient and primitive character, where vermin, once established, can never be eradicated without persistent labor and attention, which ought not to be expected of men who have spent the day in no easy duty upon the field.

No. 1 (Capt. J. H. McIver): Has 100 convicts, and is almost identical in detail with No. 2. The hospital has a better building, and I found it cleaner and somewhat better kept. There was but 1 patient, suffering from malaria, and none had died during the two years last past. This one building alone was furnished with iron beds and spring mattresses. The wash- and bath-room had no floor, only a narrow plank platform, on which the convicts took their Sunday baths.

No. 3 (Capt. C. N. Christian): Has 95 convicts. The buildings are less in number, smaller, and not in so good condition as Nos. 1 and 2. The hospital had 1 patient, suffering from some affection of the heart. None had been lost during the present year, and, in the absence of Captain Christian, I was unable to ascertain the mortality of last year.

The quarters of overseers and guards were smaller and in worse condition from overcrowding and dilapidation than Nos. 1 and 2. Otherwise there was little to be said of a comparative nature between them. I was informed that No. 3 is operated under a lease which has but one more year to run, and that its renewal is not contemplated; that the Northampton Farm, across the river, is now undergoing surrender and abandonment, and Nos. 1 and 2 have been purchased, and are now the property of the State. These facts seem to make further remarks respecting No. 3 and the Northampton Farm unnecessary, while the permanent character of Nos. 1 and 2 command the best counsel of wisdom and experience for their prosperity and success.

Speaking only from the standpoint of sanitation, I would respectfully suggest the following improvements on Nos. 1 and 2, in the order of their importance:

1. That a windmill be erected at each of these two camps, with tank of suitable dimensions to hold say a week's supply of water, together with the necessary water supply-pipes, plumbing and sewerage. As all the buildings are one story, the tank could be built of brick, raising the floor ten (10) feet above the ground, and the brick could be made on the farm.

2. Change all beds in Hospital No. 2, and overseer and guard-rooms of both camps from wooden bunks and slats to iron frame and spring mattresses.

3. Plant a grove (8 to 10 acres) of forest trees at each

camp to modify the intense heat of the summer sun. The trees adapted to that locality are numerous, and among them are the sugar and Norway maples; the white, the water and the willow oak, the persimmon and black walnut, and best and choicest of all, the great Columbian pecan, whose nut commands the highest price of any nuts known to commerce. The trees should be set from 30 to 50 feet apart, according to their habits, requiring from 16 to 49 trees to the acre. All except the pecan can be obtained from the nurseries of the country at 25 to 50 cents each, and the grafted pecan of the specific variety named from the nurseries of the Gulf States at $1.50 each in quantity.

All of which is respectfully submitted,

A. W. SHAFFER,

Sanitary Engineer State Board of Health.

LETTER OF TRANSMITTAL.

RALEIGH, N. C., January 1, 1903.

To His Excellency, CHAS. B. AYCOCK,
Governor of North Carolina:

The undersigned Board of Directors of the State's Prison of North Carolina have the honor to submit to you herewith the report of Mr. J. S. Mann, Superintendent of said Prison, for the years 1901 and 1902, with the reports of Dr. Jas. R. Rogers, Physician, and Mr. Jno. M. Fleming, Warden, which give the history of the management of said institution during said years, and show its condition on the 1st day of January, 1903.

The said reports have been approved by this Board, and it concurs in the recommendations made in the report of the Superintendent.

E. L. TRAVIS, *Chairman.*

BIENNIAL REPORT

OF

THE STATE'S PRISON,

FOR THE YEARS 1901 AND 1902.

REPORT OF THE SUPERINTENDENT.

RALEIGH, N. C., January 1, 1903.

To the Honorable, the Board of Directors of the State's Prison:

The present management formally took charge of the Prison on April 3, 1901. An immediate investigation was made into its condition, financial and otherwise, and a careful inventory was taken of all property on hand. We found, in cash and in other assets subsequently converted into cash, the sum of $53,877.80. We have paid on debts contracted by the preceding administration the sum of $33,262.69, leaving a net balance chargeable to us of $20,615.11. Having paid all bills for supplies purchased during the month of December just passed, there is to-day absolutely no indebtedness against the Prison, and we have in the treasury a cash balance of $23,994.23, or $3,379.69 more than the net balance received from our predecessors. We have on hand solvent credits, products of the State farm over and above the necessary supplies for the year 1903, and other cash assets, to the amount of $36,905.36, which, added to the $3,379.12, and making $40,284.48, constitutes our surplus of earnings over expenditures to January 1, 1903. No appropriation for the Prison was made by the last Legislature, and I am of the opinion that it can be maintained for the next two years without assistance from the State.

In making up this account, we have followed the precedent

of the former administration and left entirely out of consideration such farm products as will be required for the use of the farm during the present year. Absolutely no valuation has been placed upon any article which is not expected to be sold and converted into cash. In another particular we have advanced a step further, and present no separate account for permanent improvements, notwithstanding a number of expenditures which precedent, at least, would justify our charging to such an account. We have expended two hundred and fifty-one dollars in the improvement of the administration building, shingled the prisoners' dining room and one of the buildings formerly constituting a part of the Prison, and partially covered the other; both large stock barns at the farm have been thoroughly rebuilt and newly brick underpinned; at both camps, large, roomy shelters have been erected for the protection of the farm implements and machinery; two barns at Camp No. 1 have been practically rebuilt, and a third newly shingled; at Camp No. 2, the dwelling has been partially recovered and an addition built; a new modern gin plant has been erected on the site of the old peanut factory, and two gins and presses installed; the gins are the latest improved Munger system, and the outfit, including repairs to the engine, cost $3,181.21; $8,009.63 were expended in implements and labor during the summer and fall of 1901, in rebuilding and repairing the dike on the farm, which was broken by the floods in May preceding; ten fine mules have been purchased for the farm, at a cost of fifteen hundred dollars; a large quantity of agricultural implements and improved farm machinery, including a gasoline engine and a corn harvester and shredder for each camp, have also been purchased; we have paid $2,587.72 to the owners of the Anson County farm for a release from that contract; we have paid the State Treasurer six thousand dollars interest on bonds issued for the purchase of the State farm, and refunded to the State $1,216.61 paid for the recapture of escaped convicts. All of these expenditures,

and others of a similar character, have been charged against us in our account for current expenses.

POPULATION.

The population of the Prison is gradually diminishing. In 1894, the average number of convicts was 1,234; in 1896, 1,198; in 1898, 1,091; in 1900, 860; during the present year, 819. The reason of this is easily understood. Many of the large counties are now engaged in road building, and use their convicts upon this work. Not only is this true, but the strong and robust convicts from neighboring counties, by order of the presiding Judge, are usually sent to re-enforce these county chain gangs, while the females and the weak, feeble and maimed are sent here to become a burden upon the resources of the Prison. I am an advocate of good roads and road building, but think this policy is unfair and unjust to the Prison management. Every county that wishes to do so, should be permitted to use its own criminals, but it should retain them all, except such as are sentenced for life or for a long term of years. Convicts from those counties that do not maintain a chain gang should be sent to the Prison so long as the Constitution requires the Prison to be as nearly self-supporting as possible, and the public expects it to be entirely so. I can see no difference in permitting a county to demand and receive the convicts of a neighboring county, and permitting it to demand from the management of the Prison, without cost, all the convicts it may need—either the one should be prohibited or the other allowed—and if the latter is permitted, the logical and inevitable result will be the maintenance of the Prison by State appropriation.

There is still another injustice in the present plan: The retention of the strong and robust convicts in the counties and the sending of the weak, sick and enfeebled to the Prison necessarily increases the death rate; consequently a comparison of this institution with similar institutions in other

States creates a wrong impression and reflects upon the management.

ANSON COUNTY FARM.

In December, 1901, a compromise was made with the owners of the Anson County farm, whereby the lease held by the Prison was surrendered to the lessors upon the payment to them of $2,587.72, in addition to the rent due for the year 1901. This sum, the equivalent of one year's rent under the lease, has been paid by us out of the earnings of the Prison, but under no circumstances should be considered a liability of this administration. We paid it simply as the best means of ridding the Prison of an unfortunate contract made by a previous management. The lease lacked four years of expiring, and the records show that the greater the effort to secure a profit from the farm, the greater was the loss sustained. I believe the compromise will save the State at least five thousand dollars.

TILLERY FARM.

On December 31, 1901, the lease held by the Prison on the Tillery farm, in Halifax County, expired, and it was decided not to enter into a renewal. This was the last of the many farm leases to which the Prison has been a party, and some of which, to say the least, have been a source of irritation and annoyance.

SHIRT FACTORY.

At the beginning of the present administration, a shirt factory was in operation at the Central Prison. This, by agreement with the contractors, was discontinued during the summer of 1901. The enterprise was found to be unprofitable, and, consequently, unsatisfactory.

BRICKMAKING.

During the fall and winter of 1901 there seemed but little demand for brick, and as there was a considerable supply on

hand, we discontinued brick making in order that the hands so engaged might be sent to the farm and on contract work. The wisdom of this action is shown from the fact that we still have on hand a million of brick, while the hands who would have been engaged at the brickyard have been bringing us a steady income. Brickmaking, however, will be resumed whenever our supply has been exhausted and the demand justifies it.

REWARDS.

In a recent opinion, the Attorney-General has held that the Prison should pay all rewards offered for the recapture of escaped convicts, and the expense of their return, and in accordance with this opinion we have refunded to the State from our earnings $1,216.61, the amount paid on this account for the last two years. No other administration has ever been charged with such an expenditure, but has received this assistance from the State in addition to whatever appropriation was made by the Legislature for its support.

CALEDONIA FARM.

The present farming operations of the Prison are confined to Caledonia, the State farm. In May, 1901, the dike on this farm was almost destroyed by a river freshet. The first and principal break was at the upper end, just below Bull Hill Ferry. The torrent of water rushing in at this point soon filled the farm and broke the dike all along the lower end. About two hundred acres of fine lowland was covered with sand from one to four feet in depth, destroying its fertility. Nearly all the remaining lowlands were badly washed and greatly damaged. Crops were growing on all these lands. The soil had been carefully and thoroughly prepared, the ditches put in order, and under the cotton and peanuts commercial fertilizer had been used. The corn was young, but promising, and a magnificent wheat crop was nearing maturity. All the crops in the low ground, and what is known

as the second low ground, and in the bottoms and ravines, were totally destroyed, and the canals and ditches filled to the level of the surrounding lands. You gentlemen will recall that during the visit of inspection made by you at my request, the damages were estimated, after a careful investigation, at thirty thousand dollars. Much of the land was again planted, but only to be destroyed by a second freshet. After due consideration, it was decided to rebuild the dikes, and the work was begun in August and continued with some interruptions until practically completed. Under the advice of a skillful engineer, the main break was rebuilt, with a base at least one-third larger than the old dike, and the dirt had been thoroughly packed in place. The dike on the lower end of the farm had been completed. More than eight thousand dollars in labor and implements had been expended upon the work. On January 1st, a third freshet swept away almost the entire new work at the main break and an adjoining section of the old embankment, and damaged the dike along the lower end of the farm to even a greater extent than the May freshet. Small breaks were made, but considerable damage done the main dike at other points. We have been unable to repair the damage a second time, but hope to begin the work during the present year. Until the dikes are restored, the lowlands of the farm can not be cultivated with any assurance of maturing a crop, and, indeed, a large section of them can not be cultivated at all for lack of drainage. With the exception of the lowlands, however, the farm is in excellent condition. It is well stocked with a good team and with improved farming implements and machinery, and the buildings at both camps are in good repair. The team is in fine condition, and there is an abundant supply of corn, hay and fodder on hand for the next twelve months, in addition to that enumerated among the cash assets of the Prison. The health of the prisoners at the farm has been remarkably good for the past two years. This is peculiarly gratifying in view

of the policy adopted of retaining the disabled and incurable at the Prison and sending the weak and feeble prisoners to the farm, with instructions that they be given such light outdoor and open air work as their physical condition will permit—a policy which, in my judgment, is most humane.

In January, 1901, another severe misfortune befell us. The peanut factory, situated upon the farm and then in use as a cotton gin, was destroyed by fire. The gins and other machinery, together with eighty-six bales of cotton and three thousand bushels of peanuts, which were stored in a nearby building, were also burned. The loss was total. The fire was discovered about one o'clock at night, and when first seen had gained such headway as to be beyond control. In the afternoon of the day previous a wire in the seed cotton passed into one of the gins, and upon coming in contact with one of the saws, ignited the cotton. This fire, however, was easily extinguished, and several bales of cotton afterwards ginned, and upon closing down the machinery at night everything seemed in perfect order. There must, however, have been a spark left smouldering, possibly in the dust heap, which later caused the destruction. This, at least, is the most reasonable theory that an investigation has suggested.

The principal buildings and their contents at both farm camps are now insured for the next two years, the premium on which has been paid in full. The amount of insurance is $15,000 on boilers and $42,575 on other property.

In August, a new gin plant was erected on the site of the peanut factory. This plant consists of a gin house, cotton house and seed house. Two new steam presses and two new huller gins of the Munger system have been installed. The plant is said to be one of the finest in the State, and has been doing excellent work during the present season.

CONTRACTS.

During the past year the earnings of the Prison have been derived in a large measure from contracts. About sixty per

cent (60) of the convicts have been employed in contract work. This furnishes a certain, definite return each month, which is available for current expenses. I am persuaded it is a correct policy to divide the Prison labor between the farm and contracts. In farm work, much labor can be used that is totally unfit for contract work. And as there is a scarcity of free labor, it seems to me to be just and proper that those engaged in large enterprises in the State should have the benefit, as far as possible, of the Prison labor, when at the same time the State receives an adequate return therefor. There is absolutely no system of subletting. The convicts are at all times entirely under the immediate care and management of the Prison officials. We feed, clothe, guard, and in all respects maintain them, and are responsible for them. Every precaution is taken to prevent abuse or ill use, and I am sure there has not been one instance of such during this administration. No punishment is ever inflicted except by direct order of a supervisor and in his presence, and is altogether infrequent. Wherever inflicted, an immediate report of the same must be made to the Superintendent.

A complete and accurate record is kept of everything furnished each camp, as well as the farm and the Central Prison, and this affords indisputable evidence that an abundant supply of provisions, clothing and other necessaries of life have been provided.

RELIGIOUS SERVICES.

By virtue of section 3446, volume 2, of The Code, our predecessors have drawn annually from the Treasury, in addition to other appropriations, the sum of five hundred dollars, with which to provide religious services for the convicts. At the beginning of the present administration, Treasurer Lacy, by advice of the Attorney-General, declined to place this at our disposal. Religious services have, nevertheless, been held at the Prison with as much regularity as ever, the only difference being that in the past the good people who attended to

this work received some compensation for their services, while now they receive but a nominal sum, although they do the work as willingly and cheerfully as in the past. Sunday School is held at the Prison every Sunday under the same competent and devout management that has existed for years past. The Presbyterian, Methodist, Episcopal and Baptist denominations of the city alternate in holding church services. At the farm an arrangement was made by which church services were to be held twice a month. For the various camps we have been able to make no provisions other than to invite ministers in good standing of any church to visit and preach to the convicts whenever convenient.

Glancing back over the work of the past two years, it must be admitted that we have met with a number of serious misfortunes and setbacks, and been laden with unusual and heavy burdens. It is noteworthy, too, that we have been compelled to purchase supplies at the highest range of prices for many years past. Our largest monthly expenditure has been for meat, which for the past twelve months has averaged more than ten and a half cents per pound—almost twice as much as the same article cost our immediate predecessors. Meal, too, has been higher than for many years previous, and has ranged near the dollar mark. These things should be duly considered in examining the result of our labors.

The employees of the different camps, upon the farm, and at the Central Prison, have been zealous, faithful and efficient, and each has seemed to feel a personal interest in the proper and successful management of the institution, and for this I desire to express my appreciation and gratitude.

And now to you, gentlemen of the Board, I return my sincere thanks, not only for your confidence, but also for your generous aid and assistance. My thanks would indeed be but a poor return, but I feel that you will be better paid by a due appreciation of the people of the State for your patriotic services.

Respectfully submitted, J. S. Mann.

RALEIGH, N. C., January 1, 1903.

To the Honorable, the Board of Directors of the State's Prison:

The Dangerous Insane Department of the State's Prison, at the beginning of the present administration, was placed under the care and supervision of Dr. James R. Rogers, who is also physician to the Prison. He will make to you a report of its condition and its needs, as well as of his official acts. The department has been maintained within the appropriation granted for this purpose. A similar appropriation will be needed for the next two years, and will, I think, be sufficient.

The present law regulating the admission and discharge of inmates is inadequate. A number of them have been admitted under sentence for a definite, fixed period, and if at its termination they are still insane, and should be even more dangerous than at present, I know of no authority of law by which we could hold them longer. On the other hand, there seems to be no authority given us for the discharge of those sent here by order of the Courts for an indefinite period, and who have since been pronounced cured by the attending physician. Two of this class have been recently released under *habeas corpus* proceedings, and there are four others still in confinement whom the physician says could be safely discharged. Their names are given in his report.

The three thousand dollars appropriated by the last Legislature for improvements in the building have been expended as economically as possible, and in making such alterations as were suggested by Dr. Rogers and the Advisory Board, consisting of the superintendents of the three State Hospitals for the insane. This appropriation was not sufficient to complete the plan of improvements deemed necessary, and notwithstanding five hundred dollars of the maintenance

fund was used to complete work already begun, there are still several recommendations that have been untouched. If the department is to remain a part of this institution for the next two years, it will be necessary to increase the facilities for heating, which are now inadequate. By the expenditure of a thousand dollars, additional radiation can be added to that already in use and a sufficient amount of heat obtained. I can not and do not advise the further expenditure of public funds for the purpose of making this a permanent department of the Prison. I can not think this a proper place for the confinement of these unfortunate people. The acts of an insane man can never make him a criminal; if a criminal becomes insane, he is at least entitled to a suspension of punishment during his affliction; and in neither instance is confinement in the State's Prison either just or humane. Are these people too dangerous to be cared for among the patients of other hospitals? If so, let them be cared for in a separate building; or, if need be, in a separate and distinct institution, but let it be outside of *prison* walls. I believe a healthy public sentiment will demand and eventually secure its removal. Can it be consistently said that now, during an era of acknowledged prosperity among the people of the State, the State itself is too poor to do simple justice by its most unfortunate class of citizens?

Respectfully submitted,

J. S. MANN.

REPORT OF THE WARDEN.

RALEIGH, N. C., December 31, 1902.

HON. J. S. MANN, *Superintendent, Raleigh, N. C.*

SIR:—As Warden of the State's Prison, I beg to submit the following report for the two years ending December 31, 1902:

The discipline of the Prison is good, and there has been no outbreak against authority. The prisoners have been very cheerful and industrious, promptly performing the work assigned them. There are quite a number of young criminals, who might, very advantageously, be separated from the older and more hardened.

The work in the machine shop has been confined entirely to repairs; the steam pipes in the building being old, require constant attention. The laundry machinery, also, is old and almost worn out.

Religious services are held every Sabbath—the Christian Endeavor from 9:30 to 11:30; the regular Sabbath School from 2 to 3, by several of the very best men of the city; and in addition to these services, the ministers of the four principal denominations of the city—Presbyterian, Episcopalian, Baptist and Methodist—hold religious services every Sabbath afternoon from 3 to 4 o'clock. All these services are attended and enjoyed by the convicts.

There is now in bank $250.50, less $18.28 paid for Sabbath School quarterlies and song books, to the credit of the Sabbath School and library fund. Of this amount, $50 was drawn from the Treasury, the remainder collected from persons visiting the Prison.

Our garden, outside the Prison walls, worked by convicts who are not otherwise employed, and are generally useless for hard labor, yields sufficient vegetables for several months' supply, and is very valuable to the Prison.

Respectfully submitted, JOHN M. FLEMING,
Warden.

REPORT OF PHYSICIAN.

To the Superintendent and Honorable Board of Directors of the North Carolina State's Prison.

GENTLEMEN:—In making my biennial report of the Medical Department of the State's Prison, the tabulated reports below will show, in a condensed form, the vast and constant amount of work done. We have been fortunate in that we have had a less number of accidents, fewer serious surgical operations, less tendency to epidemics, and a higher standard of general health.

It is my understanding that the counties, with few exceptions, send their weak and infirm to the State's Prison, but retain the strong and robust to work on the county roads. This seems evident, since the books at the Prison show that twenty-nine per cent (29) are unsound on examination when admitted. This is unjust to the management, and if kept up will greatly increase the death rate.

The Superintendent has very properly, in my judgment, ordered all the disabled, chronic and incurable returned from the camps and farms to the Central Prison hospital for care and medical attention. This fact will certainly increase the death rate, but give to the poor and unfortunate prisoner more comfortable hospital quarters, a greater variety of well-selected and cooked foods, and in many cases a promise of a new lease on life. With the consent of the Superintendent and Board of Directors, we have set aside separate apartments in the hospital for the tubercular subjects and contagious diseases of all kinds. These patients are required to sleep, eat and exercise in squads to themselves, and in this way they do not come in contact with the otherwise sick but curable cases which may be confined in the hospital at the same time.

We have several times during the year had chemical and

bacteriological examinations of the drinking water used in the Prison, and in every instance it has been free from impurities of all kinds. The yards and cells have been exceptionally clean, and the sanitary condition excellent in every particular.

The number admitted, 580; examined, 533; sound, 412; unsound, 121; sent to farms, etc., without examination, 47.

The following are the principal diseases treated during the two years ending December 31, 1902, including deaths and births; also reports of physicians in charge of camps and farms:

Prison Physician.

PHYSICIAN'S REPORT OF THE MOUNTAIN CAMPS.

I have the honor to submit a tabulated synopsis of my report for the year ending November 30, 1902, of the two camps on the S. and W. Railway, in Mitchell County.

I would say in regard to the sanitary conditions of the camps that they have been good, with but very few exceptions. The most unfavorable thing about the camps is their location, near the brink of the Toe River, where they are exposed to the winter gales and have but little sunshine during the winter season. The condition for drainage has been very good. The water supply most of the time has been obtained from springs and small streams from pure sources. The prevalence of pneumonia at Lashley's camp in January and February was due to an epidemic of influenza.

Yours truly,

F. H. GILREATH,
Physician in Charge.

The number of these women is 32. They have been at this camp over six months. There has been no death among them during that time.

Yours very truly,

F. M. REGISTER,
Physician in Charge.

NORTH WILKESBORO, N. C., December 13, 1902.

DR. JAMES R. ROGERS, *Prison Physician, Raleigh, N. C.*

DEAR SIR:—I hand you herewith my report of the sanitary condition of convict camp near North Wilkesboro.

The sanitary condition of cell blocks and camp, as a whole, is good. Sickness has mostly been of a minor character, with only one death, of apoplexy. The camp is supplied with excellent drinking water.

Respectfully submitted,

GEO. DOUGHTON, M.D.,
Physician in Charge.

PHYSICIAN'S REPORT OF SANITARY CONDITIONS AT DOVER CONVICT CAMP.

There has been one broken rib, a broken clavicle, and dislocation at left second metatarso-phalangeal joint. An epidemic of parotitis and of dysentery has visited the camp. Malarial fever has prevailed all along. There have been light attacks of diarrhœa. At one time there was a dozen of the men suffering from stomatitis, not necessitating any loss of time, however. There has been no death from disease, and the sanitary condition of the camp is good.

Emanuel Hartness was killed August 26, 1901, in attempting to escape. Bud Wright was killed accidentally January 29, 1902. Henry Hardee was killed by guard while attempting to escape November 20, 1902.

The men at this camp are in a good, healthy looking condition.

Most respectfully,

RAYMOND POLLOCK,
Physician in Charge.

REPORT OF SUPERINTENDENT STATE HOSPITAL FOR DANGEROUS INSANE.

RALEIGH, N. C., December 31, 1902.

To the Honorable Board of Directors:

The Superintendent presents the following report to December 31, 1902:

In this (his first) biennial report will be included a brief account of the events surrounding the establishment of the present management, with the chapter (755) of the Public Laws of the Session of 1901, enacted by the General Assembly of North Carolina, viz.:

"*The General Assembly of North Carolina do enact:*

"SECTION 1. That the Hospital for the Dangerous Insane is hereby created a corporation under the name of the State Hospital for the Dangerous Insane, and shall be under the direction and management of the Board of Directors of the State's Prison, which shall be *ex officio* the Board of Directors of the said corporation, which Board shall, in its name, have power to receive, hold and manage all such property or estate as may be hereafter given to, or otherwise acquired by the said corporation, and shall have the same control and direction of the affairs of the said corporation as is given by law to the Board of Directors of other State Hospitals. The said Hospital shall be located in the State's Prison, where the dangerous insane are now cared for and treated, in which Hospital shall be admitted, cared for and treated, the dangerous insane, as now provided by law.

"SEC. 2. That Section 62 of Chapter 1, of the Public Laws of 1899, is hereby repealed.

"SEC. 3. It shall be the duty of the Board of Directors of said corporation, as soon as practicable, by partitions, walls and otherwise, to fully and completely separate the said Hospital from said Prison, and they shall change the same so as to conform to the purpose of a hospital for the insane. They shall advise with the Superintendents of the three Hospitals for the Insane before making such changes as to what is necessary for the safety, comfort and welfare of the patients. It shall be the duty of the Board of Directors of the State's Prison to furnish to the said Hospital all labor free of charge, and all material at cost, necessary for building said walls and partitions,

and for placing the said wards and apartments herein referred to in a proper condition; and the said Hospital shall not be a part of the State's Prison, but shall be the State Hospital for the Dangerous Insane. That the Board of Directors of the State's Prison is hereby directed and required to furnish to the Hospital heat, lights and water at cost, and do all things proper and necessary for the comfort, maintenance and humane treatment of said dangerous insane herein committed to its care. In said Hospital the sexes and races shall be kept in separate wards and apartments.

"SEC. 4. The Board of Directors of the State Hospital for the Dangerous Insane shall appoint a skilled physician, educated to his profession, of good moral character, of prompt business habits and of kindly disposition, to have charge of the insane committed to its care. He shall be required to perform the duties of physician to each of said institutions, and shall be paid from the funds belonging to the said institutions respectively such amount as shall be prescribed and agreed upon by the Board of Directors. He shall hold his office for four years, unless sooner removed by the said Board, which may, for infidelity to his trust, gross immorality or incompetence to discharge the duties of his office, fully proved and declared, the proof recorded in the book of their proceedings, remove him and appoint another in his place.

"SEC. 5. The said physician shall have the same powers and perform the same duties as the Superintendents of the other State Hospitals, and such additional duties as may be prescribed by the Board of Directors, and in addition thereto, he shall make a special study of penology, and crime in all its aspects, and shall make special biennial reports thereof to the Board of Directors for transmission to the Governor and the General Assembly. The said Board is hereby authorized to buy such books on these subjects as may be necessary; the books to be the property of the Hospital. It shall be the duty of the Superintendents of the other State Hospitals to visit the Hospital for the Dangerous Insane from time to time, and at least once a year each, for consultation and advice, and they shall report to the Board of Directors of the said Hospital with such suggestions as they may deem proper and best for the government thereof, and for the treatment of the patients, but their powers shall be advisory only. They shall be allowed only their traveling expenses, to be paid by their respective institutions.

"SEC. 6. That Chapter 1, of the Public Laws of 1899, shall, as far as practicable, be applicable to, and shall regulate the government of the State Hospital for the Dangerous Insane, when not inconsistent with the provisions of this act, except that there shall be elected only such assistants and other officers as the said Board of Directors may think proper.

"SEC. 7. That the sum of $5,000.00 is hereby appropriated annually for the support and maintenance of the State Hospital for the Dangerous Insane, and the sum of three thousand dollars ($3,000.00) is hereby appropriated for the purpose of carrying the provisions of this Act into effect.

"SEC. 8. This Act shall be in force from and after its ratification.

"In the General Assembly read three times, and ratified this the 15th day of March, A. D. 1901."

By section 1 of the above act the State Hospital for the Dangerous Insane was created a corporation under the direction and management of the Board of Directors of the State's Prison, at Raleigh. Since 1897, the dangerous insane of the State had been under the care of the staff of the State Hospital at Raleigh, and the west end of the State's Prison building—that portion at present accommodating the dangerous insane—had been made use of as the Hospital for the Dangerous Insane. With events transpiring since my accession as Superintendent, April 15, 1901, this report deals.

As authorized by the Act of 1901 (*vide supra*), the west wing of the State's Prison was completely separated from the Prison, materials for building walls and partition being furnished at cost by the Board of Directors of the State's Prison, and convict labor being employed. By August 1st, this work was practically completed, and the Hospital lighted and furnished with water and heat from the State's Prison at cost.

The disposition of the space furnished by the four-story wing was as follows: On the ground floor was located the colored male ward and apartments, the kitchen, dining and store rooms. Underneath the kitchen and dining room, a storage room was provided. On the second floor was provided an office and apartment for steward, and a white male ward. The third floor was given up entirely to ward and apartments for white male patients. On the fourth floor, wards and apartments for white and colored female patients were provided, a thin temporary board partition separating

the races. A separate temporary apartment was also furnished for the female attendant on the fourth floor. For want of space, a separate dining room for the colored race could not be provided. A portion of the colored male ward adjoining the kitchen is made use of for this purpose, so that the races are in no way associated. Meals are served to female patients in their ward also.

The following by-laws, regulations and instructions, designed by the Superintendent and approved by the Board of Directors May 3, 1901, were printed in neat pamphlet form for the aid and enlightenment of all connected with the institution. Each attendant is furnished with a copy:

BY-LAWS.

The following instructions, approved by the Board of Directors, May 3, 1901, are designed by the Superintendent to help attendants who are willing to be taught.

It is hoped that each attendants will make himself familiar with the spirit as well as the letter of these teachings, and that his own good sense and sympathy for the afflicted will not allow him to go wrong in any emergency not covered by these rules.

This pamphlet is to be returned to the Superintendent when the attendant leaves the service of the Hospital:

BOARD OF DIRECTORS.

1. A regular meeting of the Board of Directors shall be held in the city of Raleigh annually, on the first Wednesday in May, but other meetings may be held at such stated times as may be agreed upon, and a meeting may at any time be called by the Chairman, and must be called at the request of two members of the Board, or of the Superintendent and one member of the Board. Three members of the Board shall constitute a quorum.

2. All questions for consideration of the Board shall be submitted in writing and decided by a majority of the members present.

3. The Board of Directors shall at each annual meeting appoint an Executive Committee, which shall consist of two members of the Board and the Superintendent of the Hospital, and shall serve for one year. So far as such course may be deemed expedient, the members of this committee shall be such members of the Board as may be resident nearest to the city of Raleigh, or resident at such place or places as will enable them most readily to come to Raleigh. Two members of this commmittee shall constitute a quorum.

4. The Executive Committee shall, in the absence of the Board of Directors, be the advising body with whom the Superintendent shall confer in regard to the business of the institution, and they shall be clothed with full power to do all acts necessary for the proper conduct and management of the institution, except in such cases as the law requires the action of the full Board, or when prevented by a special order of the Board, and they shall meet bi-monthly at the Hospital, or at such place in Raleigh as may be agreed upon, for the transaction of business within the scope of their duties. On these occasions it shall be their special duty to examine the books and audit the accounts of the Steward for the expenditures of the preceding months, and order such expenditures as may be needed for the ensuing months on the requisitions of the Superintendent; and they shall report in writing at the regular meetings of the Board upon the general condition of the Hospital, and recommend such modifications of existing regulations as they may deem expedient, and shall also report the amount of the outstanding indebtedness of the institution. The Executive Committee shall report all their proceedings separate from the minutes of the proceedings of the Board of Directors, which shall at all times be open for the inspection of any member of the Board of Directors. The Superintendent shall be Secretary to the Executive Committee, and the Chairman or Secretary of the Executive Committee shall have power to call the committee together in special session whenever he shall be of opinion that the good of the institution so demands.

DUTIES OF THE SUPERINTENDENT.

1. The Superintendent shall devote so much of his time as is necessary for the proper care and welfare of the institution. He is the chief executive officer under the Directors of the institution, and all officers and employes shall receive their instruction from him.

2. And it shall be his duty to see that all officers and employes of the institution are energetic, industrious, punctual, exact, and in all respects faithful in the performance of their several duties, as prescribed in these by-laws.

3. He shall direct such medical, moral and physical treatment as in his judgment will be conducive to the comfort and amelioration, or best adapted to the relief of the patients, and shall conduct the correspondence of the institution, and make report of same to the Board of Directors.

4. There shall be kept by the Superintendent a well-bound book, to be styled the "Patient Book," in which shall be set out in intelligible form, under the name of each patient in the Hospital, his or her age, social condition, residence, and name of nearest relative, nationality, name of Judge sentencing, the character of the mental disease,

the supposed cause of disease, the duration of such affliction, when received, when discharged or removed, whether cured or improved, whether dead; if dead, the cause or supposed cause of death, and any and all striking features and incidents of such patient's case, for the use and benefit of the Hospital and of medical science.

5. At each bi-monthly meeting of the Executive Committee he shall exhibit all the records of the institution; if required, its general state, the names of persons received or removed, with such remarks and suggestions as he may deem useful; at the December meeting of the Board furnish a tabular view of the condition of the institution for the preceding year, deduced from the records, with a list of the patients who have been subjected to mechanical restraint, its duration, character and cause.

6. He shall give all persons employed in the Hospital such instructions as are best adapted to carry into effect all the rules and regulations of the institution, and he shall see that these rules and regulations are strictly and faithfully observed and executed. Subject to the instructions of the Board of Directors, and, in their absence, of the Executive Committee, he shall determine what attendants and other assistants are necessary.

7. All records, papers, memorials, important letters, minutes of proceedings, vouchers, reports, and other papers and books pertaining to the Hospital shall be carefully arranged and labelled and filed away in the business office of the Hospital.

8. In the course of their business the Superintendent shall, at all times, have access to all the wards and apartments of the Hospital; but no other officer or employe shall, at any time, enter the female department, or any ward or apartment therein, except by the permission or instruction of the Superintendent, and then in the presence of the female attendant; nor shall the female employe enter the male department, or any ward or apartment therein, except by like permission or instruction.

STEWARD AND CHIEF ATTENDANT—HIS DUTIES.

1. He shall keep an accurate account of all purchases, and of moneys expended by him, both on account of the patients, and also for the institution. He shall take receipts for all articles delivered to him for the supply of the table or household, and file them subject to the bi-monthly examination of the Executive Committee.

2. He shall exhibit through the Superintendent his vouchers, books and accounts to the Executive Committee at their bi-monthly meetings.

3. He shall constantly observe the conduct of all persons employed in subordinate positions, see that they do their duty, and report to the Superintendent any instance of neglect or misconduct he may see, or of which he may be informed.

4. Under direction of the Superintendent, he shall make purchases, attend to buildings, and see that they are kept in order.

5. He shall assist in maintaining the police of the establishment; shall see to the opening and closing of the house, and that the attendants and servants rise and commence their business at the ringing of the bell, and retire at proper season at night; that the warmth, cleanliness and ventilation of the house are attended to.

6. He shall, when directed by the Superintendent, receive visitors, give them all suitable information, and accompany them to such parts of the building as are open for examination.

7. He shall always be present when food or medicine is administered coercively to patients, when restraint is applied, and when they take their baths. He shall keep a faithful list or record of their clothes, and also frequently pass through the different wards, aiding and encouraging the attendants in their efforts to amuse or employ such patients; and in every way endeavor to promote the good order and discipline of the Hospital by seeing that the Superintendent's instructions in reference to occupation, exercise and clothing are faithfully and properly fulfilled, and by guarding against disturbances, escapes, suicides, exposures, etc.

8. He shall see that the clothing, etc., is taken care of, and for this purpose shall provide himself a book in which he shall open an account with each attendant who has charge of a ward, and crediting him with all that is destroyed by the patients, condemned, or otherwise properly accounted for. Whenever an article is missing, he will institute an immediate investigation, and if it can not be properly accounted for by the attendant in whose charge it was placed, he will report the same to the Superintendent, and by his order deduct the value of the same from the wages due the attendant, or make such other entry upon his books as the Superintendent may direct.

9. It shall be his duty to devote his whole time to the institution and not absent himself from the premises except by special permission from the Superintendent.

10. It shall be the duty of the chief attendant to see that the moral treatment of patients and the conduct of attendants conform in all respects to these by-laws and the instructions of the Superintendent.

DRUGGIST AND BOOKKEEPER.

1. The druggist and Hospital Steward of the State's Prison, in addition to his duties there, shall perform the duties of druggist at the State Hospital for the Dangerous Insane, and in addition thereto shall do the bookkeeping for both departments respectively. He shall constantly reside in the Hospital for the State's Prison, and be absent only upon recommendation of the Superintendent, and shall

be paid $50.00 annually, which amount shall be deducted from his salary as druggist at the State's Prison.

2. Under the direction of the Superintendent, he shall prepare and put up the medicines prescribed, and make such records thereof as are required. He shall keep the apothecary room and room for medical stores in order, wait upon visitors, copy and direct letters, and perform such other services as may be required of him by the Superintendent.

3. He shall exercise extreme caution with regard to all poisonous preparations, and see that all such have cautionary label attached, and that the person to whom they are delivered has full knowledge of their nature. In any case where what appears like a dangerous or poisonous dose is prescribed, he shall not put up or give out the same until he has first called the attention of the Superintendent to the matter and received his instructions.

4. No bottles or cups shall be given out without having legible labels attached, giving the name of the patient, and, if necessary, the dose of the preparation.

5. He shall see that bottles and cups and all apparatus and instruments used in the wards or elsewhere are returned to the dispensary promptly and in good order; and shall prevent loss and waste by collecting and returning such articles as might become dispersed through the Hospital frequently.

ATTENDANTS.

1. The attendants shall treat the patients with uniform attention and respect, and greet them with friendly salutations, and exhibit such other marks of kindness and good will as evince interest and sympathy. They shall speak in a mild, persuasive tone of voice, and never address a patient coarsely or by a nickname.

2. On rising in the morning every attendant shall see that each patient confided to his or her care is washed and decently dressed. Attention shall be given to the person and dress of each patient during the day as often as required by disorder or any want of cleanliness.

3. An attendant must always be present at the meals, carve the food and distribute it to such as can not do it themselves, and see that each one has his or her proper supply, and takes it properly. Care shall be taken that no patient carries away a knife, fork, or other article from the table, and the knives and forks shall be counted after each meal to prevent any being lost.

4. No attendant shall ever apply any restraining apparatus to a patient, except by order of the Superintendent, or of a resident officer under his direction.

5. The patients are to be soothed and calmed when irritated, encouraged and cheered when melancholy and depressed. They shall never be pushed, collared or rudely handled.

6. When attendants receive insulting and abusive language, they must keep cool and forbear to recriminate or threaten. Violent hands shall never be laid upon patients under any provocation, and a blow shall never be returned, unless in the clearest case of necessary self-defence. Sufficient force to prevent injury to themselves or others shall always be applied gently. Authority must be maintained by kindness of manner and diginity of deportment.

7. Attendants shall never place in the hands of patients, or leave where they can obtain, any knife, razor, rope, cord, medicine, or any dangerous weapon or article, and shall see that they do not conceal any such article about their bed or person. Neither shall they deliver any writing or letter to or from a patient without permission of the Superintendent, nor retain in their possession any writing of a patient.

8. Attendants must not leave the institution nor remain absent except by express permission of proper authority. When away the conduct and conversation of patients must not be repeated. No company shall be admitted into the apartments occupied by the patients, except by permission of the Superintendent.

9. It shall be the duty of the attendants to keep the patients' rooms and halls perfectly clean and well ventilated; to have the beds aired and sunned and made in proper season; to keep all the doors of the rooms closed when the patients are in bed.

10. The attendants must never give up the keys of the passages, nor let anyone into the halls without permission.

11. Every patient must be in charge of some responsible individual at all times, unless permitted to be at large by the Superintendent.

12. No patient shall leave his or her ward without the consent of an officer, and no new patient without the order of the Superintendent.

13. All persons on duty at the Hospital must rise at the beginning of the morning bell, unless excused.

WATCHMAN.

1. The watchman of the State's Prison shall also perform the duties of watchman to the Hospital of Dangerous Insane. He should be careful to keep up the strictest vigilance during the night, never allowing himself to sleep while on duty, or to fail in any particular to discharge his trust with fidelity.

2. It shall be his duty to pass around the buildings at least once every hour in the night, besides strictly observing such special directions for the night as shall be given him by the Superintendent or other superior officer.

3. He shall notice all unusual sounds in the patients' rooms, and give immediate information of the same to the proper attendant.

4. He shall report to the Superintendent all irregularities or violation of the rules of the institution which may come under his notice, and enter in his watch-book any remarks he may have to make upon the occurrences of the night.

OTHER EMPLOYES.

All other employes about the institution whose duties have not been specifically defined in the foregoing by-laws, shall strictly conform to their general spirit, and shall always be selected with reference to their general fitness, and not only for the purpose for which they have been specifically employed, but also for the companionship and oversight of the patients while at work out of the wards, and in their walks over the Hospital grounds.

RULES AND REGULATIONS.

1. The Steward and chief attendant shall turn in to the Superintendent daily written reports of the different departments, and matters of general interest to the institution. Matters of urgency must be brought to the attention of the Superintendent at any time.

2. Visitors will not be entertained by the Hospital. Frequent visits to officers, employes or patients will not be allowed. Visiting the wards will be regulated by direction of the Superintendent. Persons wishing to visit particular patients must obtain permission of the Superintendent. None but relatives or near friends of patients will be allowed to see them, unless a request in writing from their nearest relatives is presented.

3. None but those entrusted with ward keys shall go into the wards without special permission from the Superintendent. No person must be invited to the Steward's table without special permission of the Superintendent.

4. No smoking shall be allowed in or about the institution building. Every person is positively forbidden to bring intoxicating liquors upon the premises. The use of intoxicating liquors by employes of the Hospital is strictly forbidden. No person may furnish patients tobacco, except by permission of the Superintendent.

5. The work of the patients being a part of the treatment and directed by the Superintendent, must be for the institution; they must not be allowed to work for anyone else, nor for each other, except by special permission in each case from the Superintendent. All orders for purchases for the patients from private funds in the hands of the Steward must be in writing and be approved by the Superintendent.

6. It shall be the duty of all the officers to report to the Superintendent all disobedience of the rules and regulations, and all failures in a strict performance of duty on the part of the employes that may come under their notice, or be brought to their attention. And all persons employed in any capacity in the institution are required to report to the Superintendent any mistreatment of patients by anyone that may come under their notice.

7. Employes will give timely notice to the proper officer when they wish to be relieved from duty on account of sickness or other cause, otherwise they are expected to perform their duty punctually.

8. The institution contracts for the entire time of all in its employ, and no private business must take the time and attention which is due to the Hospital. No person engaged in the service of the institution will be allowed to receive presents or gratuities from patients or their friends. Business transactions with patients are forbidden, either buying or selling.

9. All visitors to the Hospital are to be treated with the greatest respect and civility. Visitors are not allowed on Saturdays or Sundays.

10. All employes are forbidden to be absent from the institution except by special permission from the Superintendent.

11. All employes will be furnished with a copy of these by-laws, and ignorance of the rules will not be accepted as an excuse for their violation.

12. Conversation between the sexes in the corridors, at the entrances to the wards, in the laundry, or in other unsuitable places, is strictly forbidden. The female attendants will not be allowed in the wards or rooms of the male attendants under any circumstances.

13. All employes of the institution are required to give fifteen days' notice before leaving, or forfeit their wages for that length of time. Payments will be due on the 15th of each month for services up to the first of the same month.

14. For disobedience of the by-laws, regulations or verbal orders of officers, employes will be dismissed at the discretion of the Superintendent.

No change will be made in these by-laws, except by a two-thirds vote of the Directors present at any regular meeting of the Board.

When I assumed the duties of Superintendent, April 15, 1901, the total population of the Hospital was thirty-three (33), as shown in the table below. Nearly all these patients had been inmates of one of the three State hospitals, or of the State's Prison. These sources were soon relieved, however, so that a large majority of those committed since April

15, 1901, have been committed directly by the Courts. The general hospitals for the insane must have been greatly relieved by having the responsibility of this class shifted, thus being able to devote themselves more particularly to true hospital work. To be sure, they transferred to us only those patients charged with serious crimes, but even the transfer of these few must have raised an enormous burden of responsibility. Taking all together, our early population was a most discouraging lot. Those admitted from the State hospitals had committed grave crimes; from the State's Prison came insane convicts, most of who were serving long sentences; or, having completed their terms of imprisonment, had not received their discharge because of insanity. The Courts committed to us cases which had previously been compelled to undergo confinement in the State's Prison along with convicts. Practically all were hopelessly deranged, as shown by the fact that no patient admitted previously to 1900 has recovered. Many were physically bankrupt, either by reason of long confinement or congenital or constitutional defects. A large number were victims of chronic organic disease. The soil was rich for terminal infections, which fact accounts for the percentage of fatal events.

Causes of Death.	Men.	Women.	Total.
General Paresis	2	1	3
Cardiac Lesions	1	1	2
Tuberculosis	3		3
Chronic Diarrhœa (Cancer Cæcum)	1		1
Pneumonia (probably Tuberculosis)	1		1
Syphilis of Liver (Amyloid)	1		1
	9	2	11

Those admitted more recently have been for the most part committed directly by the Courts from the rural districts, and belonged to the farming or laboring class. They promise far

better results, as evidenced by the fact that four of the patients admitted since 1900 are now practically well and of sound mind, viz., George McNeil, Thomas P. Manness, Lee Hill and Thomas Suggs.

I should now strongly urge an amendment to the law, providing for the discharge of such patients, not only for reasons of justice and right, but also to relieve the State of the burden of maintaining thoroughly safe persons. The Courts, too, have committed insane persons with a definite sentence for a term of years. This seems to me to be illogical and unwise, since it is impossible for a jury to prognosticate a recovery, and unjust to sentence an insane person as a punishment for a crime. Furthermore, at the expiration of the time covered by the sentence, no matter what the mental condition of the patient may be, we have no right, according to the present laws, to retain him. Such a person, if still insane, would obviously be a menace to the community if set at large. The Courts should have the power, in their discretion, it seems to me, in the first place, to commit unconvicted criminal insane persons—*i. e.*, persons charged with crimes who are found to be deranged—either to the State hospitals or to the Hospital for the Dangerous Insane. Provisions should be made, on the other hand, for the transfer of any improper criminal case from the State hospitals.

The modern tendency in the treatment of the insane is to create for the general class of insane persons institutions which shall be hospitals in fact as well as in name, the idea being to do away with the custodial features, to have the "open door" system, freedom from window guards, and full liberty of premises; to accord to the individual every possible liberty; in fact, to establish the hospital idea. It manifestly retards the growth and execution to have to provide custody for a few inmates of the hospital who may be possessed of dangerous tendencies, inclined to escape and to become a menace to the community, and a source of worry and anx-

iety to the hospital authorities. On the other hand, I am convinced that the State's Prison building is not the place for the custody, care and treatment of any class of insane persons. I am free to confess that the treatment given to patients in the institution has not been entirely satisfactory to me. A busy physician can not afford, for the slight remuneration received, to attend to more than the medical needs of patients at his daily rounds. In spite of these facts, we have struggled to get the institution into good shape, and with a degree of success, we believe. Certainly from a financial view point, we have succeeded; for the individual cost of maintenance has been an exceedingly low figure. This seems the best and only argument in favor of the State's Prison enclosure as a location for the Hospital.

As soon as practicable, I would vigorously recommend the creation of a large, centrally and rurally located institution, where all the dangerous insane of the State may be cared for, the incurable cases from the State hospitals (*vide supra*) being transferred to it. The sending of persons to such an institution would not preclude the employment of the best agencies for their care and recovery, but of course they could not be accorded the liberty which is given to the ordinary insane. The conclusions of the International Congress, recently held abroad, according to the New York press reports, were to the effect that the State would provide for the dangerous insane, and that the ordinary insane should be cared for in homes or hospitals, the object, I presume, being to afford the best protection to the community and at the same time to facilitate recovery.

EMPLOYMENT OF PATIENTS.

Among the disadvantages of the present location is the want of occupation for the patients. Except for a small garden in the Prison grounds, and odd jobs such as carrying wood and water, they are entirely without employment. The

female patients assist with the sewing. A farm and grounds and outdoor departments would enable us to employ a large number.

COST OF MAINTENANCE.

The monthly per capita cost of maintenance was $10. The total monthly pay-roll amounts to $99.18. The cost of fuel, light and heat was small. It is probable that the appropriation ($5,000) made for the last year will be sufficient to meet the expenses of the present. For the year beginning December 1, 1902, we would ask for $5,000.

REQUIREMENTS.

We would ask for a sum sufficient to tear out the old wooden stairways and replace them with iron ones. In order to accomplish this, we ask for $1,000.

Repairs are badly needed in the water closets. Without these, we can not keep the closets cleanly, or prevent foul gases from returning from the closets. For this purpose we would ask $1,000.

The temporary partition separating the female white and colored patients is of thin board. A good solid wall should be built immediately. This will require $500.

The heating plant is entirely inadequate. The pipes are too small and the amount of radiation is altogether insufficient. Nothing short of a new system will insure sufficient heat to make the wards comfortable in the coldest weather. This is the opinion of experts on this subject. This will require $1,000, making a total of $3,500 necessary to do the work recommended by the Advisory Board.

The following tables show the source of all inmates April 15, 1901, and all admitted since that time:

MOVEMENT OF PATIENTS.

	Men.	Women.	Total.
Number of Patients April 15, 1901	27	6	33
Admitted between April 15, 1901, and December 31	17	5	22
Total population	44	11	55
Discharged since April 15, 1901 (died 12; cured 2)	14	2	14
Remaining December 31, 1901	30	9	41

Total received	44	11	55

At the beginning of my service, April 15, 1901, there were eight (8) patients under physical restraint; at present there are two. The Hospital has been entirely free from accidents and contagious diseases of all kinds.

We acknowledge with pleasure two annual visits from the Advisory Committee; two visits from members of the State Board of Health; Dr. T. O. Powell, Superintendent of the State Hospital, Milledgeville, Georgia, accompanied by two members of the Executive Committee; and several other visits from time to time from friends of the institution.

The foregoing embodies the principal events since my election, April 15, 1901, to the present time; and in conclusion it becomes my pleasing duty to acknowledge, with gratitude, the assurance of confidence, encouragement and support which you have given me.

I desire also to express my appreciation to the clerk of the institution for the very valuable aid he has rendered me in the performance of my duties. I am,

Very respectfully,

JAMES R. ROGERS,
Superintendent.

RALEIGH, N. C., January 6, 1905.

To His Excellency, GOVERNOR C. B. AYCOCK.

SIR:—We have the honor to submit herewith the biennial report of the State's Prison for the years 1903 and 1904, embracing the reports of Hon. J. S. Mann, Superintendent; John M. Fleming, Warden, and Dr. James R. Rogers, Physician in Charge. These reports have all been approved by this Board, and show the condition of the institution on January 1, 1905.

We commend to your favorable consideration the recommendations made by Superintendent Mann, and in addition and supplemental thereto would respectfully offer the following, passed by the Directors at their meeting held this day:

"*Resolved,* That this Board recommend to the Legislature about to assemble the establishment of a State Reformatory for young criminals of the white race, and suggest that fifty thousand dollars of the $60,000 of four per cent. State bonds now held by the State's Prison be used in the construction of said Reformatory.

"*Resolved further,* That it is the sense of this Board that a Reformatory, if established, should be in charge of a Board of Directors of its own and kept entirely separate and distinct from the State's Prison.

"*Resolved further,* That we recommend that if a Reformatory is established, and the funds from the surplus of this institution be used as suggested, that the State's Prison should

in that event be relieved from the payment of the interest on the bonds known as State Farm Bonds, as now provided by law."

Very Respectfully,

(Signed) B. F. Aycock, *Chairman.*
W. E. Crosland,
John P. Kerr,
J. G. Hackett.

REPORT OF THE SUPERINTENDENT.

To the Honorable Board of Directors of the State's Prison:

I beg to submit to you herewith my report of the financial and physical condition of the State's Prison for the year 1904, and also the reports of the Warden and the Prison Physician for the same period.

In our financial statement we have not enumerated any article of farm produce that will not be converted into cash. We have omitted from the list three thousand barrels of corn for the use of the farm during the year 1905; and we have on hand more than a sufficiency of forage for the entire year. We have not enumerated as an asset any article that will be consumed or used in the operation or conduct of the prison. No credit has been included that is not absolutely solvent. At the Central Prison we have on hand more than two hundred tons of coal and fifteen hundred cords of wood—the latter for use of our brickyard during the coming season; but neither of these has been counted as an asset. A year ago we valued the cotton on hand at thirteen cents per pound; in our present estimate we have valued it at 6½ cents. Corn is to-day worth more than fifty cents per bushel, but we have thought best to make that valuation. Our cotton seed have been sold at sixteen dollars per ton, but not delivered. Our brick have been sold also, but not delivered. It will be observed that we have on hand to-day in cash, State bonds, solvent credits, cash items and surplus farm produce to the sum of $132,867.75. The present management received from their predecessors in 1901, after the payment of all existing claims, the net sum of $21,538.65, which being deducted from the amount on hand leaves $111,329.10, which represents our net earnings over

expenditures during the past four years. Every item of indebtedness of which we have any knowledge, including the December bills, has been paid, and there are absolutely no liabilities. We have received no appropriation from the State.

In 1899 the State issued $110,000 of four (4) per cent. debt bonds for "the purpose of paying off the indebtedness of the State of North Carolina arising out of the conduct and management of the State's Prison," and at the same time issued sixty thousand dollars ($60,000) of four (4) per cent. bonds for the purchase of the North Carolina State Farm. Under a proviso of the law authorizing the issue, the State's Prison was charged with the payment of the annual interest accruing upon the farm bonds, amounting to $2,400 per annum. I do not understand that it was made responsible for the bonds themselves, but only for the interest upon them. On the 11th of last April we purchased $58,500 of the State Prison debt bonds and paid therefor the sum of $61,425. On the 6th of December just passed we purchased farm bonds of the face value of $1,500, paying therefor the sum of $1,567.50; so that we now have on hand $60,000 of North Carolina four (4) per cent. bonds, the annual interest upon which exactly offsets the amount of interest charged by the State against the prison. Had we not purchased these bonds, $62,992.50 of the prison earnings would have remained idle in the treasury and the interest charged against the prison would have accrued just the same.

These bonds are now on deposit for safe-keeping in the Citizens' National Bank, and are certainly a very satisfactory investment of prison earnings, which may be needed by the institution before their maturity.

The prison and its various branches are in good physical

condition. During the past four years there has been no epidemic, no riot, no great disorder of any kind among the inmates. Individual cases of misbehavior and disobedience requiring correction have, of course, occurred; but, generally speaking, the prisoners have behaved exceptionally well and have rendered respectful and willing obedience to those in authority over them. This gratifying result has been achieved, I think, not only by the strict discipline that has at all times been maintained, but largely also by the kind and considerate treatment uniformly bestowed upon all who were deserving.

To the hospital equipment we have added two wards for tuberculous subjects, one for the whites and one for the colored, and these subjects are now kept entirely separate from other patients. Additional plumbing has been done and the sanitary condition improved.

The State farm has yielded another abundant harvest. The prisoners' quarters at both camps were repaired last summer. At Camp No. 1 a stone and cement floor was substituted for the wooden one. The outer buildings upon the farm are now all in good repair. The residence of the Prison Physician at the farm was totally destroyed in the spring fire. The insurance of $500 was promptly paid and a larger and more comfortable house has been erected upon the same site. A new stock barn has been built at Camp No. 2, and additional barn room and shelters at Camp No. 1. The stock upon the farm is in excellent condition. Twenty-four mules and two horses were purchased in the early spring and added to the drove, while thirteen others were culled therefrom and sold at auction upon the Norfolk market.

On January 1, 1901, the population of the prison was 860; at this date, January 1, 1905, it is 658, showing a decrease

within four years of 202. The county chain-gang system, undoubtedly, is responsible for this decrease in population. If the present policy of the State is continued, the population of the prison, within a very short time, will consist mainly of two classes, the larger being the feeble or non-producing class, the other long-term, desperate criminals. With a constantly diminishing number of wage-earners, the problem of self-support is yearly becoming more difficult. The public expectation is that the prison shall not be a burden upon the taxpayers of the State, and in an earnest endeavor to meet this expectation we have found it necessary to place upon contract work and upon the State farm all classes of convicts that were able to do manual labor. We have not hesitated to send beyond the prison limits men who were serving life sentences and sentences for a long term of years. In consequence of this several notorious prisoners, taking the most desperate chances, have made their escape and are still at large, notwithstanding the vigilance of prison officials and of municipal and county officers. I do not believe this policy ought to be continued, and yet I am sensible of the fact that it must be, unless prohibited by statute and the institution maintained by State appropriation. Criminals are imprisoned for the protection of society and the prevention of crime; self-support or financial profit from the prison should be a matter of secondary importance.

During the years 1903 and 1904 ninety-nine prisoners under twenty years of age have been received at the prison, notwithstanding the leniency of Superior Court Judges and not taking into account the many—certainly a large number—that must have been committed to the chain-gangs of the various counties.

There are some reformatory features in prison life. Many of those who are sentenced here are the thriftless and idle whom want has led into crime. During the term of their imprisonment they are required to perform regular and effective work of some kind and are taught to do skillfully whatever work is required of them. They must also retire at night at a particular hour and arise in the morning with equal regularity, and take their meals punctually at the appointed time. These requirements must stimulate habits of industry and regularity of life and be very beneficial to that class of people who, as a rule, find their way into prison life.

I am, nevertheless, convinced that the State's Prison cannot in any sense be called a reformatory and am doubtful if a term of imprisonment here can have any permanent reformatory effect upon the ordinary inmate. The association is vicious. I am persuaded that a reformatory for youthful criminals is greatly needed in North Carolina, and that many youths who are now straying further and further from the paths of honor, if placed under proper restraint and discipline and entirely separated from the more hardened criminals, could be developed into useful citizens.

In conclusion, I desire to express my appreciation and sincere thanks for the intelligent and efficient services of my assistants at the prison, upon the farm and at the various camps. I am deeply sensible, too, of my obligation to you, gentlemen of the Board, not only for your confidence, but also for your valuable aid and assistance in solving the many difficult problems with which we have had to deal.

Respectfully submitted,

J. S. MANN,
Superintendent.

RALEIGH, N. C., January 1, 1905.

To the Honorable Board of Directors of the Dangerous Insane Department:

I hand you herewith the report of Dr. James R. Rogers, the Physician in Charge of the dangerous insane, and beg to call your attention thereto. The capacity of the institution is fifty, but there are now fifty-four inmates. In consequence of this overcrowded condition, we are compelled each night to lock four patients in prison cells, thus violating the spirit, if not the letter, of the law. Some months ago I wrote to each Judge of the Superior Courts in the State, notifying them of the condition of the institution and requesting that further patients should not be committed. Since then but one has been sent us.

The department has been maintained during the past two years within the appropriation of five thousand dollars per annum made by the last Legislature. The special appropriation of one thousand dollars for heating and plumbing was insufficient and was augmented from the maintenance fund, thirteen hundred and fifty-six dollars and thirty-six cents being used for this purpose. A new heating plant has been installed entirely separate and distinct from that of the prison. The plumbing has been entirely overhauled and new baths and closets substituted for the old wherever needed. I believe the department is in first-class sanitary condition. The inmates have been carefully attended and provided with all the necessaries of life and made as comfortable as possible. I desire especially to commend to you the regular and efficient services of Dr. Rogers. His daily visits and careful attention to the inmates betoken his evident interest.

I believe the department can be maintained for the next two years to its full capacity with an annual appropriation of

five thousand dollars. If more than fifty patients shall be committed to us, not only the appropriation for maintenance should be increased, but additional room for their safe-keeping should be also provided.

My opinion now is the same as expressed to you in my report of two years ago, that the department ought not to remain a part of the State's Prison.

Respectfully submitted,

J. S. MANN,
Superintendent.

REPORT OF THE WARDEN.

HON. J. S. MANN, *Superintendent.*

SIR:—As Warden of the State's Prison I beg to submit the following report for the two years ending December 31, 1904:

The discipline of the prison is good, better, in fact, than I have ever known it. Punishments are less frequent, and no very severe measures have been necessary for quite awhile, the *certainty* of punishment deterring the more unruly.

The greatest care is taken to see that the buildings and grounds are kept in good condition, and that there is no accumulation of refuse matter about the enclosure.

The hospital has recently been fitted with new, modern closets, which must be very much more sanitary than the old.

The old, worn-out washing machinery of the laundry has been replaced by the more modern and improved machines which were used in the shirt factory, which are doing excellent work.

The work of the machine shop has been confined entirely to repairs.

Regular religious services are held every Sabbath in the prisoners' dining-hall, the Christian Endeavor in the morning, by Dr. Curtis and Miss Bilyeu; Sabbath-school at 2 P. M., by S. W. Whiting, John T. Pullen, T. W. Blake, S. D. Waitt, Rev. Cæsar Johnson and Mrs. S. C. Blair; and preaching at 3 P. M. by a minister of one of the four principal denominations of the city. The prisoners seem to take great interest in all these exercises, and eternity alone can compute the good results.

We have burned twenty-two kilns of brick—approximately 4,860,000—of which about ten per cent. are salmon. We have found ready sale for them, in fact, could have sold many more.

We have killed 4,500 pounds of pork, and now have on hand about forty hogs, some of which will do to kill in February.

Our garden has yielded an abundant supply of vegetables, in their season, for the whole prison population.

All of which is respectfully submitted.

JOHN M. FLEMING,
Warden.

DEPARTMENT DANGEROUS INSANE.

Raleigh, N. C., December 31, 1904.

To the Honorable Board of Directors:

The Superintendent submits the following report for the two years ending December 31, 1904:

In my first biennial report two years ago I gave an account of the establishment of the present institution for the treatment and custody of the dangerous insane. A description of the plans according to which the west wing of the State's Prison building, where the dangerous and criminal insane had been confined since this was selected, altered and arranged to meet the requirements of the new law providing for the separation of the dangerous insane from the convicts of the State's Prison, was also given. A set of rules and regulations governing the conduct of the employees and officials of the hospital, which had been approved by the Directors, was published. The policy as determined upon and outlined for the management of the institution, as followed during the first two years and as set forth in that report, has been continued as nearly as possible during the two years just passed.

At the meeting of the last Legislature the sum of one thousand dollars ($1,000) was appropriated for permanent improvements. This sum was not sufficient to meet the expense of installing the system of heating and plumbing which was recommended and which was found to be absolutely necessary for the comfort and hygienic safety of the patients. After consulting with your honorable Board and the Superintendent of the State's Prison, however, it was decided that we would be justified in economizing in one general maintenance expense and in appropriating the money thus saved to the payment of the balance due on the heating and plumbing systems. We have now a new and complete system of heating. The boilers were placed in the basement of the hospital, and are not in any way connected with the prison heating plant. The heating is now sufficient, uniform and reliable.

New sanitary closets, urinals and bath-tubs have also been put in to replace the old-style plumbing, which prevents the return of the foul gases from sewers and discharge pipes.

The total cost of all this work was $2,356.36. It is thus seen that $1,356.36 of the above has been taken from the general maintenance fund of $5,000 annually. This has necessitated a most rigid economy. We have, however, been able to clothe the patients warmly and cleanly and give them plenty of good, wholesome food in a close sort of way, in order to provide for and have the improvements in question, necessary to health and comfort.

COST OF MAINTENANCE.

The average monthly cost *per capita* of maintenance for each patient not including permanent improvements, has been about $8.50. By referring to the financial statement appended the proportion of the maintenance applied to actual food and clothing and heat expended for other purposes is seen.

While the maintenance seems an exceedingly low figure, I wish to emphasize the fact that nothing necessary to actual health or comfort is denied the patients at any time.

*George McNeill escaped from the hospital October 22, 1902, while we were trying to secure his release; was recaptured March 8, 1904, and sentenced to fifteen years in State's Prison, where he is at present.

The utmost capacity of the building as it is now arranged is 49 patients, as shown in the tables. There are at the present time fifty (50) patients being cared for. Five patients are being confined at nights at present in cells of the prison. This is unavoidable. The Superintendent has several times written to the Judges sentencing these patients, informing them of the fact that there was no more room. In spite of this they have continued to commit patients to the hospital, and we have been compelled to take them and make use of the State's Prison cells to confine the overflow. If there is to be no limit to the number to be committed, then we should have more room, for the arrangement of confining even a limited number in the State's Prison cells is heartily disapproved. It is an injustice to the patients thus confined, adds to the danger of escapes, requires extra attendants, or works a hardship on the usually quite sufficient number. Besides, I dislike to have the hospital patients pass to and from the State's Prison. In case of an epidemic we would be open to criticism for allowing what is, though necessary now, unquestionably illegal, and, more important, unhygienic. I most respectfully request that this matter be inquired into and corrected, either by making provisions for the care of a larger number of patients in the hospital or by setting a definite number as the utmost capacity of the building at the present time. In this way we may be no longer forced to admit patients beyond such stated capacity. The figures show that there is an increase of about seven patients annually in the hospital population. This necessitates the provision almost immediately of more room.

It would, therefore, seem unwise to expend funds on the present building for permanent improvements beyond actual necessity to carry out plans as previously set forth by the Advisory Board. A cost of $1,500 will be required to replace the old, worn wooden stair-ways by fire-proof iron ones and to place permanent partitions between certain of the wards now separated only by temporary board walls. As intimated in my last report, the Superintendent, whose duties as an active physician prevent his devoting much more than sufficient time to the hospital at his daily visits to attend to the medical needs of the patients and inspect generally the conduct of affairs, cannot afford for the slight remuneration received to give a systematic study to each individual case admitted. At an early day, however, I hope to have a completed history of each patient's case, with such information as can be gotten as to the influence of heredity, alcoholism, syphilis and other etiological factors in each case, with a diagnosis and, as far as possible, an abstract.

COST OF MAINTENANCE.

FOR THE YEARS 1903 AND 1904, ENDING NOVEMBER 30, 1904.

Balance on hand December 1, 1902	$ 527.70
Special appropriation for heating plant	1,000.00
Appropriation for maintenance for two years	10,000.00
Total	$11,527.70
Disbursements for the two years	$11,511.81
Balance on hand December 1, 1904	15.89
Expended for improvements (heating, plumbing, etc)	$ 2,356.36
Expended for pay-rolls	3,013.09
Expended for fuel, lights and water	743.20
Expended for food and clothing	5,399.16
Total expenditures, as above	$11,511.81
Number of patients in hospital November 30 1904	54
Average number of patients about	45
Average yearly cost *per capita*, not including improvements	$ 102.00
Average monthly cost *per capita*, not including improvements	8.50

With about twenty per cent. increase in the number of patients in the hospital over 1903 and 1904, we would ask for $6,000 per annum for maintenance. To tear out the old wooden stair-ways and replace them with iron ones, and complete the wall between the white and colored female patients, we ask for $1,500.

We have been free from accidents and contagious diseases of all kinds.

The Advisory Committee and State Board of Health have made their usual annual visits, and report everything in good sanitary condition throughout.

Very respectfully,

JAMES R. ROGERS,
Superintendent.

REPORT OF PHYSICIAN.

To the Superintendent and Honorable Board of Directors of the North Carolina State's Prison.

GENTLEMEN:—In this my biennial report of the Medical Department of the State's Prison the tables below will show, in a brief way, the amount and quality of work done. We have had many more chronic cases to treat, owing to the fact that the incurable and helpless ones have been returned from the camps and farms to the Central Prison for attention. We have been entirely free from epidemics of all kinds, the number of acute cases have been less, and the character of the cases much more mild in type than formerly. (See print No. 1; Table No. 2).

Very respectfully

JAMES R. ROGERS, M. D.,
Prison Physician.

TABLE NO. 1.

We have had the State Bacteriologist to make several examinations of the drinking water used in the prison, and in every instance it has been free from impurities of every kind. The yards and cells have been exceptionally clean, and the sanitary condition most excellent in every particular.

The number admitted, 381; examined, 381; sound, 353; unsound, 28; sent to farms, etc., without examination, 47.

The following are the principal diseases treated during the two years ending December 31, 1904, including deaths and births; also reports of physicians in charge of camps and farms:

TABLE NO. 2.

Diseases.	*No. of Cases.*
Anthritis, acute and hermatic	6
Angina pectoris	2
Asthma	6
Burns	4
Bright's Disease	15
Cardiac dropsy	15
Colic, nephritic	4
Colic, hepatic	3
Colic, intestinal	...
Cystitis	12

Diseases.	No. of *Cases.*
Diarrhœa acute	15
Diarrhœa, chronic	24
Dysentery	9
Epilepsy	2
Fever, malarial	21
Fistula, rectal	6
Fractured leg	2
Gonorrhœa	16
Gastritis	8
Heart disease	20
Hemorrhoids	6
Indigestion, acute	28
Jaundice	6
Lagrippe	24
Meningitis	...
Nephritis	12
Neuralgia	10
Ophthalmia	12
Orchitis	6
Paralysis	2
Periostitis, chronic	4
Pneumonia	6
Prolapsus ani	6
Rheumatism	18
Rupture	15
Sciatica	4
Stricture	10
Syphilis	36
Sunstroke	1
Tonsilitis	4
Tuberculosis	48
Ulcer, chronic, leg	4
Wounds, gunshot	6
Wounds, incised	6
Wounds, contused	4
Wounds, lacerated	2

DEATHS, 1903.

J. M. Fleming, *Warden*.....Wake County.
T. M. Arrington, *Clerk*.....Nash County.

REPORT OF COMMITTEE.

RALEIGH, N. C., January 2, 1907.

To His Excellency, GOVERNOR R. B. GLENN.

SIR:—We have the honor to submit herewith the financial report of the State's Prison for the years 1905 and 1906, embracing the reports of Hon. J. S. Mann, Superintendent; John M. Fleming, Warden, and Dr. James R. Rogers, Physician in Charge. These reports have all been approved by this Board, and show the condition of the institution on January 1, 1907. Respectfully,

(Signed) J. G. HACKETT, *Chairman.*
W. E. CROSLAND,
R. H. SPEIGHT,
JOHN P. KERR.

REPORT OF SUPERINTENDENT.

RALEIGH, N. C., January 1, 1907.

To the Honorable Board of Directors of the State's Prison:

The years 1905 and 1906 have not been eventful ones in the history of the Prison. We have been fortunately spared from serious troubles of every kind and blessed with a moderate prosperity. The general health of the institution has been good, and its inmates, respectful in demeanor and obedient to authority, have appeared as cheerful and contented as could be well expected of people within prison environments.

A proper economy, without stinginess, has been the policy of the administration. The property of the Prison has been kept in repair and is now in excellent condition, but no expensive additions have been made.

Two large storage-rooms are needed at the State farm, and material for them has been ordered, though actual construction has not begun.

The population of the Prison January 1, 1905, was 658; on January 1, 1906, it was 658; to-day, January 1, 1907, it is 662.

The cultivation of the State farm requires the labor of about three hundred people. We endeavor to keep employed two hundred and fifty in railroad and turnpike work, while the remainder are used in operating the brick plant and in clothes-making and repairing.

The supply of drinking water for the Central Prison has always been obtained from an open well, with a frame covering, situated near the main building. Even with the best care and attention this was likely at any time to become infected and dangerous. We are now having drilled an eight-inch well, conveniently located, though remote from the build-

ings, and expect to carry it to a depth sufficient, if possible, to afford not only an ample quantity, but also a satisfactory quality of water.

Two years ago the sewer from the main building to its outlet through the Prison wall was examined and put in thorough repair. This sewer empties into Rocky Branch at a point just outside the Prison enclosure. We have now arranged to continue the sewer and join with the Agricultural and Mechanical College in constructing a line to the city main near the southern extremity of the city. This will certainly remove a serious menace to the health not only of this institution, but of that entire section of the community through which Rocky Branch winds its way into Walnut Creek.

The General Assembly of 1905 authorized the Prison to furnish the necessary material and labor and pave with brick the walks of the Capitol Square. Desiring not only to comply with the suggestion of the Legislature, but also that the work should be done in the most ornamental and durable manner, a proposition was submitted to the Governor and Council of State that granolithic rather than brick pavements should be laid at the expense of the Prison. The suggestion met with their approval and the work was done under their direction and supervision at a total cost of $6,584.07, which the Prison promptly paid.

The State farm did not yield as abundantly in 1906 as it did the three previous years. Two freshets in the Roanoke River during August destroyed at least two thousand barrels of corn, while the early frost in October, followed by ten days of rain, not only seriously damaged the cotton crop, but almost totally destroyed a most excellent prospect for black and mixed peas. When, however, a comparison is made with results in other agricultural sections of our State, I feel that we should be content with the moderate yield of the Prison farm.

The Dangerous Insane Department of the Prison is in good condition. It has been maintained within the appropriation

of five thousand dollars per annum which was made by the last General Assembly. The inmates have been comfortably provided for and furnished liberally with the necessaries of life. The department is intended and built to accommodate fifty people, while the average number cared for during the year has been fifty-three. This crowded condition has necessitated the confinement of three each night in cells of the Prison. An appropriation of five thousand dollars per annum is needed, and, I think, will be sufficient for maintenance during the next two years. If alterations or improvements should be directed by the Legislature, an additional appropriation for that purpose will be needed.

A statement of the present financial condition of the Prison will be found on another page. In preparing this statement we have followed the precedent established four years ago of not enumerating as an asset any farm produce that will be used or consumed upon the farm during the year 1907, but have counted only the surplus of such products as will be sold and converted into cash. Our December bills have been paid and the Prison owes no debts. It has been maintained through another two years by its earnings and has now to its credit in cash, State bonds, solvent credits, farm products at current prices, and other cash items, the comfortable reserve of $242,131.84.

In conclusion, I wish again to make acknowledgment of the faithful and efficient services of those who have assisted me during the past two years in the conduct of the Prison and to express my appreciation of the continued interest, valuable assistance and uniform courtesy of you, gentlemen of the Board.

Respectfully submitted,

J. S. Mann,
Superintendent.

REPORT OF WARDEN.

Raleigh, N. C., January 1, 1907.

Hon. J. S. Mann, *Superintendent State's Prison.*

Sir:—I have the honor to make the following report for the two years ending December 31, 1906:

DISCIPLINE.

The discipline of the prisoners has been good for the past two years. There has been no serious infraction of the rules, nor any necessity for severe punishment, nor has any been inflicted. The prisoners yield a ready obedience to the officers in charge.

BUILDINGS AND GROUNDS.

The buildings and grounds are kept in good condition—are thoroughly policed and cleaned every day—nothing derogatory to health being allowed to accumulate.

MACHINE SHOP.

The machine shop has been used entirely for repairs.

RELIGIOUS SERVICES.

The religious services continue to be held each Sabbath—by the Christian Endeavor in the morning, conducted by Dr. Curtis; Sabbath-school at 2 P. M. by Messrs. Whiting, Pullen, Blake, Waitt, the Rev. Cæsar Johnson and Mrs. Blair; and preaching at 3 P. M. by a minister of one of the city churches.

BRICK.

We have made and sold about $32,000 worth of brick and have about 20,000 unsold.

GARDEN.

We have raised an abundant supply of vegetables, in their season, for the entire Prison population here, and have on hand now quite a quantity of collards, potatoes and turnips.

Respectfully submitted,

JOHN M. FLEMING,
Warden.

DEPARTMENT DANGEROUS INSANE.

Raleigh, N. C., December 31, 1906.

To the Honorable Board of Directors:

The Medical Superintendent reports as follows for the two years ending December 31, 1906:

Under the conditions which have been set forth at length in the two previous reports the Department for Dangerous Insane has been maintained without the possibility of any radical changes or innovations. Altogether, the history of this Department during the two years just preceding may be summed up as uneventful and at the same time satisfactory. The patients have been well cared for, having been made comfortable, confined in a humane manner, and shown every consideration possible and fitting for this extremely unfortunate class.

The accommodations which the present arrangement affords have been taxed to their limit all the time. More space is urgently needed. The increase in population is now progressive, and it is only a question of time till more room will be absolutely indispensable.

The usual annual appropriation of five thousand dollars is asked for the maintenance of the Department.

Very respectfully,

James R. Rogers,
Medical Superintendent.

STATISTICAL FORM FOR THE STATE INSTITUTIONS.

Prepared according with resolutions of the National Conference of Charities and Correction, adopted May 15, 1906.

Adopted by the State Board of Public Charities of North Carolina.

Name of the institution: *Dangerous Insane Department State's Prison.*

POPULATION.

	Male.	*Female.*	*Total.*
Number of inmates present at the beginning of the fiscal year	36	13	49
Number received during the year	4	2	6
Number discharged or died during year	1	1	2
Number at end of fiscal year	39	14	53
Daily average attendance during year	39	14	53
Average number of officers and employees	13	1	14

EXPENDITURES.

CURRENT EXPENSES—

1. Salaries and wages	$1,809.39
2. Clothing	309.25
3. Subsistence	1,741.84
4. Ordinary repairs	0.00
5. Office, domestic, and outdoor expenses	1,097.25
Total	$4,957.91

NOTES ON CURRENT EXPENSES.

1. "Salaries and wages" should include salaries of Trustees or Directors, if any.

2. "Clothing" includes shoes and also materials for clothing and shoes if manufactured in the institution.

3. "Ordinary repairs" includes all of those which simply maintain the buildings in condition without adding to them. Any repairs which are of the nature of additions should be classed with "permanent improvements."

4. This item includes everything not otherwise provided for, such as furniture, bedding, laundry supplies, medicine, engineer's supplies, postage, freight, library, etc.

EXECUTIVE HEAD.

J. S. MANN, Superintendent of the State's Prison, including the Dangerous Insane Department.

JAS. R. ROGERS, Medical Superintendent and Physician in Charge.

REPORT OF PHYSICIAN.

Raleigh, N. C., January 1, 1907.

To the Superintendent and Honorable Board of Directors of the State's Prison.

Gentlemen:—In my report of the medical department of the State's Prison for 1905 and 1906 the table below will show the amount and quality of work done.

During the two years there has been admitted to the Prison 286 prisoners. Of this number 31 were unsound and 255 were sound. Owing to the fact that all the chronic and incurables are returned from the camps to the Prison for treatment and cure, we have had a large per cent. of this class to care for. The bacteriological examination of the drinking water from the large well has not been at all times satisfactory.

I commend very heartily your action in securing a deep-well system for the Prison. There is no doubt that pure drinking water adds largely to the health of any prison or camp. The cells and grounds have been kept clean and the sanitary condition most excellent in every particular.

Very respectfully,

James R. Rogers, M. D.,
Prison Physician.

REPORT OF SANITARY INSPECTION COMMITTEE.

Board of Directors State's Prison.

GENTLEMEN:—The undersigned, a committee appointed by the State Board of Health to make the regular biennial sanitary inspection of your buildings, report that they performed that duty on October 23, 1906, and are pleased to state that the sanitary condition of both the Prison Department and the Department for the Criminal Insane is good. The premises are clean, the plumbing in good repair, and the health of the inmates properly guarded.

In the Department for the Insane it is especially desirable that the floors of the water-closets and bath-rooms should be of some non-absorbent material, tile or cement. They are of wood at present, which makes it hard to keep them clean and free from odor.

In the Prison Department we note that there is a separate ward for tuberculous prisoners. We would that this could be provided also in the Insane Department.

In the Department for the Insane the stairway is entirely within, is of wood, is dark and would be a poor means of escape in case of fire. A well-lighted, fire-proof stairway and ventilator, opening on the outside as well as in the wards, would be a vast improvement.

The well, an open one, covered with boards, close to the main building and steam-house, does not meet the strict requirements of modern sanitation. It should be abandoned in favor of some supply that would be less liable to infection.

Very respectfully,

RICHARD H. LEWIS, M. D.,

W. P. IVEY, M. D.,

Committee.
